NO.27 What does SAP Commerce provide for developing payment functionality? (2)

- * A two-layered architecture framework to support flexible implementation
- * An out-of-the-box payment adapter gateway with PayPal
- * An architecture framework with services, methods, and adapters
- * Interfaces to support customer-made adapters to communicate with other payment service providers

NO.28 When creating a new PriceRow, what information can you specify? (3)

- * Country
- * Website
- * Channel
- * Scale
- * Date range

NO.29 You are creating a new promotion for a SAP Commerce storefront based on the promotion engine. What will the promotion engine evaluate when validating the promotion? (3)

- * The promotion rule's conditions
- * The promotion rule's rule group
- * The promotion rule's message
- * The promotion rule's exclusivity
- * The promotion rule's actions

NO.30 What does SAP backend integrations provide out-of-the-box? (3)

- * SAP ERP integration scenarios
- * SAP S/4HANA integration scenarios
- * SAP Customer Activity Repository (CAR) integration
- * An additional package for the integration with SAP CRM
- * Integration with SAP Marketing Cloud

NO.31 In SAP Commerce, if multiple PriceRows match a price request, which PriceRow has priority?

- * The PriceRow with NO specific product or customer
- * The PriceRow for a specific product group and customer group

- * The PriceRow with NO specific product but with specific customer
- * The PriceRow for a specific product and specific customer

NO.32 You want to feature a page on your storefront that can only be viewed by a special user group. What SAP Commerce user interface do you use to do this?

- * BackOffice Adaptive Search Perspective
- * SmartEdit
- * BackOffice Sales Organization Perspective
- * BackOffice Product Cockpit

NO.33 What are the advantages of designing your catalog with one master catalog and multiple downstream catalogs?

(2)

- * Search engine indexing can be done more efficiently
- * Different regions can have different category hierarchies
- * Promotions can be defined for a specific region
- * Performance is optimized for a large number of regions

NO.34 What is the Application Management according to the SAP Application Lifecycle Framework for Commerce?

(2)

- * A continuous work stream aimed to support, operate, and maintain the live solution once it's been deployed to a live production environment and is being used by end users
- * A continuous work stream that starts with the first deployment to production environment, aiming to provide support and live-operations management
- * A continuous work stream running the entire duration of a release, aiming to organize preparation and execution activities around a go-live event
- * A continuous work stream that starts with the first initiation phase, aiming to provide ongoing smaller development work that can be done outside of a project

NO.35 What is the difference between boost rules and promoting items? (2)

- * Boost rules are defined globally while promoted items are category aware
- * Boosting an item prioritizes it more than promoting an item does
- * Boost rules are attribute-focused while promoted items are product-focused
- * Promoting an item prioritizes it more than the boost rules do

NO.36 What should an architect be aware of when designing a product catalog in SAP Hybris Commerce? (Choose 3)

- * A catalog must have exactly one staged and one online version
- * The catalog, category and product items all carry a reference to the catalog version
- * In practice, a catalog may have many staged versions maintained concurrently
- * A product should never be created in the online catalog version
- * Staged and online data are stored in separate database tables
