* A and b or c
* A or b or c
* A and b and c

NEW QUESTION 31

An administrator is troubleshooting an application via Workbench in vRealize Operations Manager and would like to only view root causes.

Which option must the administrator select?

* Specify Time Range
* Decrease Object Scope

* Hide Consequential Evidence
* Investigate Property Changes

NEW QUESTION 32

An administrator wants to simplify the management of certificates, licenses, and passwords for each vRealize Suite component deployed by vRealize Suite Lifecycle Manager (vRSLCM).

Which feature of vRSLCM can the administrator leverage to achieve this goal?
* Locker
* Marketplace
* Content management
* Identity management

NEW QUESTION 33

A company’s data center is running out of compute resources (CPU and Memory). As a result, the administration team decided to optimize the CPU and memory value assigned to each virtual machine to save some compute resources.

How can the administrators use vRealize Operations Manager to achieve this goal?
* Under Workload Optimization, click optimize now, and run the recommended actions.
* Under Rightsizing, select the oversized virtual machines, and click resize.
* Under Recommended Actions, check the alerts, and apply the suggested fix.
* Under Reclaim, select the snapshots shown, and click delete.

NEW QUESTION 34

Which two roles does vRealize Operations Manager provide? (Choose two.)
* Breach Monitoring
* Performance Monitoring
* Network Flow Monitoring
* Application Monitoring
* Log Monitoring

NEW QUESTION 35

An administrator wants to use vRealize Suite Lifecycle Manager (vRSLCM) to deploy new vRealize Operations Manager (vROps) instance. Currently, binaries for vROps are already downloaded.

What is the next step the administrator must perform to achieve this goal?
* Add vROps to the global environment.
* Create a new environment for vROps.
* Use Easy Installer to deploy vROps.
* Deploy VMware Identity Manager.

NEW QUESTION 36

What is the role of vRealize Network Insight in the Cloud Management solution?
* It provides the ability to provision Network resources across private and public clouds.
* It provides the ability to perform Cost Management of network resources.

* It provides intelligent operations for software-defined networking and security.
* It provides Lifecycle Management for NSX-T environments.

NEW QUESTION 37

A user would like to automate the update of an already-deployed application that is using a blue-green deployment model ad also minimize downtime for the application.

Which strategy would meet these requirements?
* Create a pipeline in Code Stream that uses a Bamboo task to manage the blue and green instances.
* Create a pipeline in Code Stream with separate stages for the blue and green instances.
* Create a single cloud template in Cloud Assembly to deploy the blue and green instances.
* Create separate cloud templates in Cloud Assembly for the new version of the application.

NEW QUESTION 38

Which component of the VMware Cloud Management solution simplifies the deployment, upgrade, configuration, and management of vRealize Suite components?
* SaltStack Config
* Lifecycle Manager
* SDDC Manager
* VMware CIM APIs

NEW QUESTION 39

An administrator wants to integrate vRealize Automation with the VMware Marketplace to import pre-defined Cloud Templates.

Which integration must the administrator configure?
* SaltStack
* Orchestrator
* Operations Manager
* My VMware
