C-BOBIP-43 Exam Certification Details:

Sample Questions: SAP C-BOBIP-43 Exam Sample Question Cut Score:66%Languages:EnglishDuration:180 minsLevel:Associate

NO.94 Which of the following is a function of a Web Application Container Server?

- * It processes SOAP for Web applications.
- * It allows usage of Microsoft .NET APIs.
- * It automatically deploys Web applications without a Java Web Application Server.
- * It facilitates deployment of Web applications on a UNIX-based BI platform.

NO.95 Your report contains a table. What happens when you drop a dimension object into a blank part of this report?

Please choose the correct answer.

- * A new group is created.
- * A new block is created.
- * A new free-standing cell is created.
- * A new section is created.

NO.96 Which server can you use for searching on data, filtering, and aggregation?

- * Explorer Search Server
- * Explorer Indexing Server
- * Explorer Master Server
- * Explorer Exploration Server

NO.97 What should you consider when creating a content plan?

Note: There are 2 correct answers to this question.

- * The specific rights for folders and objects
- * The server groups required
- * The profiles needed for report distribution
- * The organization of users into groups

NO.98 How can you scale your business intelligence platform vertically?

Note: There are 2 correct answers to this question.

- * Organize servers in server groups.
- * Deploy the Web Application Server on its own machine.
- * Install a second job server on the same host.
- * Add more CPUs to the processing server's machines.

NO.99 What can you do using the Upgrade Management tool?

- * Convert Desktop Intelligence documents to Web Intelligence documents.
- * Import users from BusinessObjects Enterprise.
- * Update a Crystal Report from a previous version to the current version.
- * Change the system database to a different type.

NO.100 Which character should you use to reset the result of the RunningSum() function for either a break or a section?

Please choose the correct answer.

- * Semicolon (;)
- * Percent (%)
- * Underscore (_)
- * Comma (,)

NO.101 From which server does the Crystal Reports Cache Server request pages?

- * Report Application Server
- * Crystal Reports Processing Server
- * Input File Repository Server
- * Adaptive Processing Server

NO.102 A user is assigned to a parent group and only one of its subgroups. The subgroup and parent group have conflicting rights on a specific object. What is the net effective right for this user on that specific object?

- * The denied rights override the granted rights.
- * The granted rights override the denied rights.
- * The rights set on the parent group override the rights set on the subgroup.
- * The rights set on the subgroup override the rights set on the parent group.

NO.103 What additional functionality is available when you use the Central Configuration Manager (CCM) in a Windows environment instead of a Unix environment?

- * Change the URL of the Central Management Console (CMC)
- * Manage remote Central Management Servers (CMS)
- * Manage local Central Management Servers (CMS)
- * Configure Secure Socket Layer (SSL) encryption

NO.104 What is a benefit of configuring a Server Intelligence Agent to run with a domain account instead of the local system account?

- * Meets requirement for SSO with AD Kerberos authentication
- * Reduces security risk of storing operating system passwords
- * Simplifies management of server groups across multiple hosts
- * Enables SIA to automatically start servers in other nodes

NO.105 Which property do you enable to keep rows in a break together on the same page?

Please choose the correct answer.

- * The `Start on New Page` property in the Format Section.
- * The `Start on New Page` property.
- * The `Avoid page breaks in blocks` property.
- * The `Avoid page break` property in the Format Section.

NO.106 You want users belonging to a group called `Sales`; to view report instances in a folder called `Asia`;

Where do you grant these rights?

- * User Security for the `Asia` folder
- * Application Security for the Central Management Console
- * User Security for the `Sales` group
- * Application Security for Crystal Reports

NO.107 Which server processes platform search service requests?

- * Adaptive Processing Server
- * Event Server
- * Explorer Indexing Server
- * Explorer Master Server

NO.108 Which of the following tasks are performed by the Central Management Server?

Note: There are 2 correct answers to this question.

- * Restart servers that have stopped unexpectedly.
- * Manage auditing.
- * Retrieve documents from the Input File Repository Server.
- * Maintain a list of servers and IP addresses.

NO.109 Which of the following tasks uses the Adaptive Processing Server?

- * Run a schedule for a Web Intelligence document.
- * View a Web Intelligence document on demand.
- * View a workspace from Analysis Edition for OLAP.
- * View a Crystal Reports object on demand.

NO.110 What is the correct procedure for determining the effective rights a user has to an object?

- * Navigate to the object and invoke the Permissions Explorer.
- * Run a Security Query for a group to which the user belongs.
- * Run a Relationship Query for the user and object together.
- * Navigate to the user in the Users & Groups area, then click the Manage User Security button.

NO.111 You want to save a report to the BI Platform from SAP Crystal Reports for Enterprise and receive a Java null pointer error. Which server must be available?

- * Report Application Server
- * Adaptive Processing Server
- * Crystal Reports Processing Server
- * Adaptive Job Server

NO.112 How do you create a new server with the same settings as an existing server? Note: There are 2 correct Answers to this question.

- * Enable **Set Configuration Template** on the existing server.
- * Enable **Use Configuration Template** on the existing server.
- * Clone the existing server.
- * Enable **Set Configuration Template** on the new server.

NO.113 In BI 4.3, you want to promote a relational connection between development and quality systems. How can you automatically change the connection details?

- * Use profiles in the Central Management Console (CMC).
- * Use security profiles in the Information Design Tool (IDT).
- * Use connection overrides in Promotion Management (PM).
- * Configure connection pooling on the connection server.

NO.114 How do you track the performance of business intelligence platform services in realtime?

- * Schedule probes to run at specified intervals.
- * Include servers in your replication lists.
- * Set up profiles in the Monitoring tool.
- * Query the Auditing Data Store for metrics.

SAP C-BOBIP-43 Exam Description:

The "SAP Certified Application Associate - SAP BusinessObjects Business Intelligence Platform 4.3" certification exam verifies

that the candidate possesses proven skills and fundamental knowledge in designing, deploying and running SAP BusinessObjects Business Intelligence platform 4.3. This exam measures the candidate's knowledge of SAP BusinessObjects Business Intelligence platform, starting with the tasks involved in supporting SAP Business Intelligence platform users and groups, so as to access corporate data through the SAP Business Intelligence platform's web portal. It tests the candidate's skills in configuring and managing servers in an SAP Business Intelligence platform deployment, as well as in designing and deploying an SAP Business Intelligence platform system.
