SAP C-BOBIP-43 Exam Syllabus Topics:

TopicDetailsTopic 1- Manage calendars and publish reports- Secure applications, schedule objects, manage events, and use alerts
Topic 2- Use the Central Configuration Manager and Central Management Console to manage servers- Administer and manage BI content in single or multiple deploymentsTopic 3- Describe how information flows from server to server for system processes such as logging onto the system- Troubleshoot problems in SAP BusinessObjects Business Intelligence platformTopic 4- Design a scalable system using the concepts of High Availability- Describe the architecture of SAP BusinessObjects Business Intelligence platformTopic 5- Scalability, Sizing, Disaster Recovery and Lifecycle Management- Authentication, Authorization and SecurityTopic 6- Configure servers and perform common server management and administrative tasks in SAP BusinessObjects BI platform- Explain the role of different servers in SAP BusinessObjects BI platformTopic 7- Describe the authorisation and security features in BI 4.1- Add and manage objects in SAP BusinessObjects BI platform, manage users and groups

NO.79 Which of the following servers acts as the system auditor?

- * Adaptive Job Server
- * Web Application Server
- * Central Management Server
- * Adaptive Processing Server

NO.80 Which server can you use for searching on data, filtering, and aggregation?

- * Explorer Search Server
- * Explorer Indexing Server
- * Explorer Master Server
- * Explorer Exploration Server

NO.81 Which storage option is used to track historical memory utilization of BI platform servers?

- * Monitoring database
- * Lifecycle Management database
- * CMS system database
- * Auditing database

NO.82 On how many hosts can a Server Intelligence Agent control services?

- * As many as the number of Central Management Servers
- * As many as the number of File Repository Servers
- * As many as the number of Processing Servers
- * One

NO.83 A user views a page in a Crystal report that exists on a cache server.

Which server receives the page from the cache server?

- * Crystal Reports Processing Server
- * Input File Repository Server
- * Output File Repository Server
- * Web Application Server

NO.84 A user wants to create Web Intelligence documents. However, the necessary option is not available on the BI launch pad.

What could be the reason?

- * The user does not have rights to use the Universe connection.
- * The object level security in the Universe is not set to the appropriate level.
- * The user does not have rights to use the Universe.
- * The user does not have rights to use the Web Intelligence application.

NO.85 What can a user customize in the Account Preferences area of the Fiorified BI launchpad? Note: There are 2 correct Answers to this question.

- * Toggle the 'Use Administrator Provided Settings' option.
- * Select which tabs and tiles to display in the Home group.
- * Set the length of time that Instances remain in the Recently Run tile.
- * Identify which other users are allowed to add content to their BI Inbox.

NO.86 Which tool can you use to remove a node from an existing BI clustered deployment?

- * Central Management Console (CMC)
- * BI Launchpad (BI)

- * Information Design Tool (IDT)
- * Central Configuration Manager (CCM)

NO.87 How can you scale your business intelligence platform vertically?

Note: There are 2 correct answers to this question.

- * Organize servers in server groups.
- * Deploy the Web Application Server on its own machine.
- * Install a second job server on the same host.
- * Add more CPUs to the processing server's machines.

NO.88 You need to restart an Adaptive Job Server that is currently processing requests. What is the correct process to restart an Adaptive Job Server?

- * Disable the Adaptive Job Server, wait for job completion, and restart the Adaptive Job Server.
- * Restart the Central Management Server and restart the Adaptive Job Server.
- * Stop the Web Application Server and restart the Adaptive Job Server.
- * Stop the Adaptive Job Server, wait for job completion, and start the Adaptive Job Server.

NO.89 Which of the following tasks can you perform using the SAP BusinessObjects Lifecycle Management Console?

Note: There are 2 correct answers to this question.

- * Run and schedule replication jobs on a remote system.
- * Promote Business Intelligence objects from one system to another system in the same version.
- * Back up your Business Intelligence content.
- * Migrate Business Intelligence objects from a previous system version to a new system version.

NO.90 What is the function of a universe in the BI platform?

- * It acts as the translation layer between a Web browser and the BI platform.
- * It provides Extract, Transform, and Load capabilities.
- * It stores reporting data.
- * It serves as a semantic layer for business users.

NO.91 What is a benefit of configuring a Server Intelligence Agent to run with a domain account instead of the local system account?

- * Meets requirement for SSO with AD Kerberos authentication
- * Reduces security risk of storing operating system passwords
- * Simplifies management of server groups across multiple hosts
- * Enables SIA to automatically start servers in other nodes

NO.92 Why would you configure a second Server Intelligence Agent (SIA) on the same host?

- * To allow servers to be secured separately
- * To allow servers to run under different network accounts
- * To take over the management of the first SIA's server if it fails
- * To increase the processing capacity of the host

NO.93 Which server processes Visual Difference?

- * Central Management Server
- * Dashboard Server
- * Web Application Server
- * Adaptive Job Server

NO.94 You want to deploy SAP BusinessObjects BI 4.3 for 10000 users in total. As part of this deployment, the customer needs to ensure that the system is sized and scaled correctly. How many active concurrent users should you use for the initial estimate?

- * 1000 active concurrent users
- * 5000 active concurrent users
- * 100 active concurrent users
- * 10000 active concurrent users

NO.95 You have two Input File Repository Servers (FRSs).

How do you determine which one is active?

- * Use the Audit Data Store report.
- * Use the metrics of each FRS in the Central Management Console.
- * Use the SAP BusinessObjects Explorer.
- * Use the Repository Diagnostic Tool.

NO.96 You want to compare the contents of the system database and the contents of the File Repository Servers.

Which tool do you use?

- * Repository Diagnostic Tool
- * SAP BusinessObjects Dashboards
- * SAP BusinessObjects Explorer
- * Information Design Tool

NO.97 What server is responsible for the storage of the latest instance of a Web Intelligence document?

- * Output File Repository Server
- * Input File Repository Server
- * Adaptive Processing Server
- * Adaptive Job Server

NO.98 Where do you view merged dimensions?

Please choose the correct answer.

- * In the Report Map pane
- * In the My Objects pane
- * In the Document Structure and Filters pane
- * In the Query panel

NO.99 You want to save a report to the BI Platform from SAP Crystal Reports for Enterprise and receive a Java null pointer error.

Which server must be available?

- * Report Application Server
- * Adaptive Processing Server
- * Crystal Reports Processing Server
- * Adaptive Job Server

NO.100 What should you consider when creating a content plan?

Note: There are 2 correct answers to this question.

- * The specific rights for folders and objects
- * The server groups required

- * The profiles needed for report distribution
- * The organization of users into groups

NO.101 What is a benefit of vertically scaling the Web Application Services?

- * Improved system database performance
- * Fault tolerance/failover
- * High system availability
- * Improved Web response speeds
