# Jul-2022 VMware 2V0-21.20PSE Certification Real 2022 Mock Exam [Q36-Q54

Jul-2022 VMware 2V0-21.20PSE Certification Real 2022 Mock Exam
2V0-21.20PSE Exam Questions and Valid PMP Dumps PDF

NO.36 Which solution can be used to automatically deploy a fully configured VMware software-defined data center (SDDC)?
* vSphere Lifecycle Manager
* VMware Cloud Foundation
* vRealize Suite
* vCenter Server

NO.37 A vSphere environment is configured with 1 Gigabit Ethernet for vSphere vMotion. The application team is complaining that when they try to migrate a powered-on virtual machine, the progress is slow and unsuccessful the majority of the time.

Which two recommendations should the administrator make to improve vSphere vMotion performance?

(Choose two.)
* Use vSphere Storage I/O Control (SIOC).
* Use at least two port groups.

* Use 10 Gigabit Ethernet or above.
* Use Link Aggregation Control Protocol (LACP) on the port group.
* Disable vSphere Fault Tolerance.

NO.38 Which action is supported over a VMkernel vMotion TCP/IP stack? (Choose the best answer.)
* Hot migrations
* Fault tolerance protection
* Virtual machine cloning
* Snapshot creation

NO.39 A new vSphere 7.0 environment is deployed with the following:

* A single vCenter Server

* Two vSAN clusters

* A vSAN default storage policy

Which statement is true regarding virtual disk availability in this environment? (Choose the best answer.)
* Replicas will be placed on different disk groups but can be placed on the same host.
* All stripes will be placed on different disk groups and cannot be placed on the same host.
* Each virtual disk will have four replicas of data.
* Each virtual disk will have two replicas of data.

NO.40 A host profile is updated with a new password that urgently needs to be changed on all hosts attached to the host profile.

Which option would an administrator select to complete the password change? (Choose the best answer.)
* Copy Settings from Host
* Remediate
* Check Host Profile Compliance
* Edit Host Customizations

NO.41 An administrator is troubleshooting a recent failure and finds the following error messages:

```
The guest OS has reported an error during quiescing. The error code was: 5 The error message was: Asynchronous operation failed: >V
The guest OS has reported an error during quiescing. The error code was: 5 The error message was: 'VssSyncStart' operation failed: 
the file specified. (0x80070002)
```

Which action has failed, thus resulting in these errors?
* Virtual machine power off
* Virtual machine migration
* Virtual machine snapshot
* Virtual machine reconfiguration

NO.42 An administrator is tasked with upgrading an existing VMware vSphere 6.5 environment to version 7.0. There are existing VMFS3 and VMFS5 datastores in the environment.

Which two statements are true regarding this upgrade? (Choose two.)

* VMFS5 is no longer supported with ESXi 7.0.
* VMFS3 is no longer supported with ESXi 7.0.
* An ESXi 7.0 host can automatically upgrade a VMFS5 datastore.
* An ESXi 7.0 host will automatically upgrade a VMFS3 datastore when discovered.
* A VMFS3 datastore cannot be upgraded; a new VMFS6 datastore is required.

Explanation

https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.storage.doc/GUID-DAD74662-E09E-4

NO.43 Which feature can an administrator use for site availability with minimal effort and a low recovery point objective (RPO)?
(Choose the best answer.)
* vSphere vMotion
* vSphere High Availability
* vSphere Replication
* vSphere Fault Tolerance

NO.44 Which tool is used to monitor the free space in the vCenter Server database? (Choose the best answer.)
* esxtop
* df
* vimtop
* vmstat

NO.45 Which VMware feature should an administrator configure to help manage and delegate CPU and memory resources?
(Choose the best answer.)
* VMware Enhanced vMotion Compatibility (EVC)
* Resource pools
* vSphere Distributed Resource Scheduler (DRS)
* vSphere High Availability (HA)

NO.46 Refer to the exhibit.
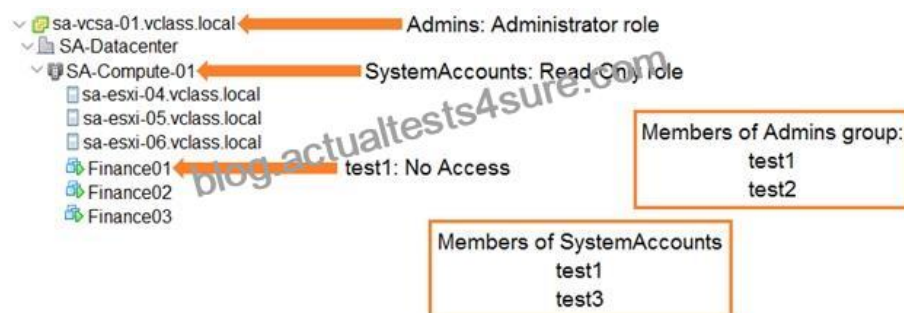

What is the effective role the test1 account has on the Finance01 virtual machine? (Choose the best answer.)
* No access
* Administrator
* Read-only
* Virtual machine user

Explanation

https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.security.doc/GUID-72EE3449-79FD-4E

NO.47 A company has one corporate datacenter (C1) and one regional datacenter (R1). There is a vCenter Server in each location. An administrator wants a central library available to C1 and R1 for all templates and ISO images.

Which two steps must the administrator take to configure the content library feature to meet this requirement?

(Choose two.)
* Create a published content library on C1.
* Create a local content library on R1.
* Create a local content library on C1.
* Create a subscribed content library on C1.
* Create a subscribed content library on R1.

NO.48 An administrator wants to ensure that when virtual machines (VMs) are powered on, Distributed Resource Scheduler (DRS) places them on the best-suited host. When the cluster becomes imbalanced, the administrator wants DRS to display recommendations for manual VM migration.

Which DRS automation level should the administrator select? (Choose the best answer.)
* Manual
* Partially automated
* Fully automated
* Disabled
Explanation

https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.resmgmt.doc/GUID-C21C0609-923B-4

NO.49 Refer to the exhibit.

Figure 8-1. vSphere Trust Authority Architecture

Which trusted infrastructure component is missing and represented by the area labeled “A”? (Choose the best answer.)
* Key Management Server
* vSphere Virtual Machine Encryption

* Key Provider Service
* Attestation Service

NO.50 A vSphere environment is configured with 1 Gigabit Ethernet for vSphere vMotion. The application team is complaining that when they try to migrate a powered-on virtual machine, the progress is slow and unsuccessful the majority of the time.

Which two recommendations should the administrator make to improve vSphere vMotion performance?

(Choose two.)
* Use at least two port groups.
* Use vSphere Storage I/O Control (SIOC).
* Use 10 Gigabit Ethernet or above.
* Use Link Aggregation Control Protocol (LACP) on the port group.
* Disable vSphere Fault Tolerance.
Explanation

https://docs.vmware.com/en/VMware-vSphere/6.5/com.vmware.vsphere.vm_admin.doc/GUID-254B2CE8-20A8

NO.51 Which feature is a prerequisite for Proactive High Availability (HA)? (Choose the best answer.)
* vCenter High Availability
* vSAN Cluster
* Predictive Distributive Resource Scheduler (DRS)
* vSphere Distributive Resource Scheduler (DRS)

NO.52 What is a requirement of Storage I/O Control?
* Storage connected through Fibre Channel
* Automated storage tiering capabilities
* Management by a single vCenter Server
* Datastores with multiple extents

NO.53 An administrator is trying to configure vCenter Single Sign-On from the vSphere Client but does NOT have permission.

Which role is required in order to configure vCenter Single Sign-On? (Choose the best answer.)
* vCenter Single Sign-On Administrator
* vCenter Administrator
* vCenter Server Appliance Root
* vCenter Power User

NO.54 Which feature can an administrator use for site availability with minimal effort and a low recovery point objective (RPO)?
* vSphere vMotion
* vSphere Fault Tolerance
* vSphere Replication
* vSphere High Availability
