Get 100% Success with Latest Salesforce Health Cloud Health-Cloud-Accredited-Professional Exam Dumps Sep 05, 2022 The Best Health-Cloud-Accredited-Professional Exam Study Material and Preparation Test Question Dumps QUESTION 37

Which three types of customizations can be managed through the Health Cloud Admin app? (Choose three.)

- * Patient Card Configurations
- * Timeline View Configurations
- * Cross Object Relationships
- * Household Relationships
- * Permission Set Assignments

Reference and details below.

Use the Health Cloud - Admin App

The Health Cloud - Admin app includes a set of tabs where you can customize Health Cloud features to support the ways your organization works with patients or members.

To use the Health Cloud - Admin app in Lightning Experience, go to App Launcher and select **Health Cloud - Lightning Admin**. To use the Health Cloud - Admin app in Salesforce Classic, use the app picker to select **Health Cloud - Admin**.

Administer Health Cloud

Customize the Health Cloud Cons

Cross Object Relationships

Cross-object relationships control which objects and fields appear in the filter selection options when creating patient or member lists.

EHR Custom Objects

These tables (EHR Patients, EHR Encounters, and so on) contain data from the source record system related to things like prescriptions, conditions, patients, and immunizations.

Patient Card Configurations

Edit the patient card view and add or remove information from EHR or other records.

Timeline View Configurations

Add or remove healthcare events from the timeline so that care coordinators have the information they need and can effectively manage patients or members.

QUESTION 38

An administrator wants to add additional fields to their Provider Search capabilities. Which two objects can they map fields from? (Choose Two.)

- * Healthcare Practitioner Facility
- * Care Provider Searchable Field

- * Person Account
- * Account
- * Healthcare Provider

Reference and details below.

Use Custom Fields to Run Provider Searches

In addition to the many standard fields in the Provider data model, you can also run searches for providers using custom fields based on your business needs. To use your custom fields with Provider Search, you can map them to custom fields in the Care Provider Searchable Field object.

- The custom fields must be in either the `HealthcareProvider` or `HealthcarePractitionerFacility` objects.
 - The custom fields must be of the type text, single-select picklist, or multi-select picklist.
1. From Object Manager, use Quick Find to find **Care Provider Searchable Field**.
 2. Create a text field to map to the custom field that you want to use in your searches.
Make a note of the API name you set for this new field.
 3. In Setup, use the Quick Find box to find **Care Provider Search Config**.
 4. Click **New Care Provider Search Config**.

QUESTION 39

With regards to Integration/Interoperability, which three statements are true about health cloud? (Choose Three)

- * The New clinical data model in health cloud is aligned with FHIR R4 standards.
- * Health cloud supports data exchange with both HL7 and FHIR enabled systems.
- * Most EHR (Electronic Health Record) data exchange today is still done via legacy HL7 v2; simple application interface.
- * Health cloud has a FHIR server.
- * The new clinical data model in Health cloud is aligned with HL7 v2-simple application standard.

QUESTION 40

How can a Health Cloud administrator change the label 'Patient Card' to 'Member Card' to be more aligned with their specific business terminology and use case?

- * Go to setup, navigate to Custom Labels, select the 'Patient_Card_Header' label, click the 'New Local Translation/Overrides' button, Select the language and enter the new label.
- * Go to the Health Cloud Admin Home page, select the Patient Card Configuration tab, and click 'New' to add a new configuration for 'Member'.
- * Go to Setup, navigate to the Patient Card object, and edit the Patient field name.
- * Edit the page layout where the Patient Card is shown, click on the attributes for the Patient Card component, and edit the name to 'Member';.
- * The labels that come with the Health Cloud cannot be changed.

QUESTION 41
