

## SAP Certified Development Associate Certification C-HANADEV-17 Sample Questions Reliable [Q29-Q48]

**SAP Certified Development Associate Certification C-HANADEV-17 Sample Questions Reliable Prepare for the Actual SAP Certified Development Associate C-HANADEV-17 Exam Practice Materials Collection NO.29** What are the key characteristics of the calculation view's Input Parameter? There are 3 correct answers to this question.

- \* It can NOT be used to filter measure values.
- \* It can be used in a conditional expression.
- \* It can be used to pass values to table functions.
- \* It is passed via reserved word PLACEHOLDER.
- \* It is passed using a WHERE clause.

**NO.30** You use path expressions (associations) in your Core Data Services to combine entities instead of using SQL joins.

What is a benefit to use these associations?

- \* It increases the performance of the query.
- \* It enforces referential constraint.
- \* It improves the writability and readability of the query.
- \* It invokes authorization checks on database level.

**NO.31** Which parameter do you adapt to change the file that is initially delivered by an HTML5 module? Please choose the correct

answer.

- \* Service\_url parameter of the mta.xml file
- \* Start parameter of the package.json file
- \* Runners parameter of the project.json file
- \* Welcome file parameter of the xs-app.json file

**NO.32** What are some of the benefits of developing applications on SAP HANA? Note: There are 2 correct answers to this question.

- \* Execution of stored procedures is faster due to the in-memory database.
- \* Reliable segregation of OLAP and OLTP workloads on different SAP HANA databases.
- \* Faster response times by using SAP HANA integrated UI rendering.
- \* HTML5-compliant Web-based user interface is supported.

**NO.33** Which OData service do you use to prevent changes to existing line items of the sap.test::myTable table?

- \* service {&#8220;sap.test: :myTable&#8221; update exclude;}
- \* service {&#8220;sap.test: :myTable&#8221; update no-authorization;}
- \* service {&#8220;sap.test: :myTable&#8221; update forbidden;}
- \* service {&#8220;sap.test: :myTable&#8221; update prohibited;}

**NO.34** To perform a specific task of an XSadvanced application, what does a user need? Please choose the correct answer.

- \* To have directly assigned a Scope
- \* To have directly assigned a Role Collection
- \* To be assigned to a Space
- \* To be assigned to an Organization

**NO.35** What are the nodes where filter expressions can be used in a calculation view? There are 2 correct answers to this question.

- \* Aggregation
- \* Union
- \* Rank
- \* Star join

**NO.36** You develop an OData service using XSODATA. Which HTTP commands can you use to define the operations on the resources?

There are 3 correct answers to this question.

- \* INSERT
- \* POST
- \* GET
- \* READ
- \* PUT

**NO.37** What are some of the advantages of SQLScript compared to plain SQL queries? Note: There are 2 correct answers to this question.

- \* It retrieves a high data volume from a database.
- \* It increases performance by parallel execution of complex SQL statements.
- \* It contains a well-defined ANSI standard.
- \* It enables modular parameterized programming.

**NO.38** From which tool can you run the XS Command Line?

- \* Local operating system shell
- \* SAP HANA studio

- \* SAP Web IDE for SAP HANA
- \* SAP HANA cockpit

**NO.39** What are the characteristics of SAP HANA calculation views? There are 2 correct answers to this question.

- \* Need database tables to execute
- \* Need an application server to execute
- \* Do NOT need an application server to execute
- \* Do NOT need database tables to execute

**NO.40** Which tool do you use to create a calculation view in a multi-target application?

- \* SAP HANA database explorer
- \* SAP HANA studio
- \* SAP HANA Web-based Development Workbench
- \* SAP web IDE for SAP HANA

**NO.41** You need to manage an exception in a SQLScript.

Which SQLScript features can you use?

Note: There are 2 correct answers to this question.

- \* CREATE EXIT HANDLER
- \* DECLARE EXIT HANDLER
- \* SIGNAL
- \* DEFINE RESIGNAL

**NO.42** Your multi-target application shall use XSJS.

Which module type do you create in your application project?

- \* HTML5
- \* Java
- \* SAP HANA database
- \* Node.js

**NO.43** You need to synchronize all unsynchronized changes of the remote GIT branch with a local GIT branch.

Which operation do you use?

- \* Pull
- \* Push
- \* Rebase
- \* Reset

**NO.44** Which new components can you use to develop native SAP HANA applications in SAP HANA extended application services; advanced model (XS advanced)? Note: There are 2 correct answers to this question.

- \* SAP HANA studio
- \* SAP HANA repository
- \* GIT repository
- \* SAP Web IDE for SAP HANA

**NO.45** Which of the following are characteristics of SAPUI5? Note: There are 3 correct answers to this question.

- \* Provides device-specific user experience

- \* Supports customer-specific theming
- \* Provides an extensibility concept
- \* Enables responsive application design
- \* Renders the UI on server side

**NO.46** Where do you add controls to the user interface?

- \* JSON model
- \* OData model
- \* XML view
- \* Manifest file

**NO.47** You need to install SAP HANA 2.0, express edition to develop a native SAP HANA application. Which of the following deployment options do you have? Note: There are 2 correct answers to this question.

- \* Installation on Linux OS
- \* Installation on Windows Server
- \* Usage of virtual machine on Microsoft Windows
- \* Installation on Mac OS

**NO.48** Which OData capacities are supported in SAP HANAextended application services, advanced model (XSA)?

There are 3 correct answers to this question.

- \* Projection
- \* Join
- \* Aggregation
- \* Association
- \* Union
