* Evaluation
* Solution
* Acceptance
* Approval

NEW QUESTION 54

Conducting elicitation by asking Questions and documenting responses from relevant stakeholders has the following strength:
* prioritization setting.
* analytical thinking.
* sharing of information.
* encouraging participation.

NEW QUESTION 55

Which technique represents a small, concise statement of functionality or quality needed to deliver value to a specific stakeholder?
* User stories
* Lessons learned
* Business case
* Scope modelling
Explanation/Reference: https://blog.fhyzics.net/fibaar/ba-techniques-user-stories

NEW QUESTION 56

What is a valid reason for prioritization?
* Requirements which are of significant personal interest to a stakeholder
* Effort and resources needed to implement a requirement
* Sponsor’s wish-list
* Development team’s advice to implement easy requirements

NEW QUESTION 57

In the define design options task, which of the following relates to the identify improvement opportunities element?
* Assess issues, define risks, confirm elicitation results
* Create flow diagrams, purchase solutions components, secure resources
* Increase efficiencies, identify additional capabilities, improve access to information
* Define change strategy, analyze current state, prioritize requirements

Identify Improvement OpportunitiesWhen proposing design options, a number of opportunities to improve the operation of the business may occur and are compared.Some common examples of opportunities include:

Increase Efficiencies: automate or simplify the work people perform by re-engineering or sharing processes, changing responsibilities, or outsourcing. Automation may also increase consistency of behaviour, reducing the likelihood of different stakeholders performing the same function in distinctly different fashions.

Improve Access to Information: provide greater amounts of information to staff who interface directly or indirectly with customers, thereby reducing the need for specialists.

Identify Additional Capabilities: highlight capabilities that have the potential to provide future value and can be supported by the solution. These capabilities may not necessarily be of immediate value to the organization (for example, a software application with features the organization anticipates using in the future).

NEW QUESTION 58

Which technique is used by business analysts (BAs) to measure the quality of requirements?
* Acceptance and Evaluation Criteria
* Key Performance Indicators
* Risk Analysis and Management
* Entity Relationship Modelling

NEW QUESTION 59

Which action would a business analyst (BA) propose to improve the operation of the business?
* Simplify the work people perform
* Outsource the operation team
* Assist in the daily activities
* Shadow the expert staff

NEW QUESTION 60

Which core concept defines a specific way of satisfying one or more needs in a context?
* Value

NEW QUESTION 62

A business analyst (BA) will regularly perform stakeholder analysis to understand which of the following?
* Attitudes and influence
* Goals and objectives
* Changes in business needs
* Communication channels

NEW QUESTION 63

What type of knowledge equips a business analyst (BA) with understanding market forces, customer segments, services, products, and regulations?
* Organizational
* Industry
* Solution
* Methodological

NEW QUESTION 64

Which techniques should be applied to prioritize requirements?
* Risk Analysis and Management
* Decision Modelling and Estimation
* Interface Analysis and Interviews
* Document Analysis and Vendor Assessment

NEW QUESTION 65

Which of the following business analysis activities might be undertaken to verify requirements?
* Identifying a previously documented business need
* Comparing a model with another relevant model
* Organizing requirements into structures
* Evaluating alignment with solution scope
A requirement can be of benefit to a stakeholder and still not be a desirable part of a solution. A requirement that does not deliver benefit to a stakeholder is a strong candidate for elimination. When requirements do not align, either the future state must be re-evaluated and the solution scope changed, or the requirement removed from the solution scope.

NEW QUESTION 66

A business analyst (BA) is someone who elicits the actual needs of organizational stakeholders:
* in any capacity, regardless of job title.
* in a project team, with an “analyst” job title.
* in a project team, regardless of job title.
* in any capacity, with an “analyst” job title.
They elicit the actual needs of stakeholders, not simply capture their expressed desires. IT Business Analysis activities may be performed in many job titles or organizational roles.
