

## [Q42-Q57 Best Quality C\_TS422\_2021 Exam Questions SAP Test To Gain Brilliante Result!

Best Quality C\_TS422\_2021 Exam Questions SAP Test To Gain Brilliante Result!

Preparations of C\_TS422\_2021 Exam 2022 SAP Certified Application Associate Unlimited 82 Questions

SAP C\_TS422\_2021 Certification Exam Topics:

Topic Areas Topic Details, Courses, Books **Production Orders in SAP S/4HANA > 12%** Determine BOM item category, describe order status management and set user statuses, configure availability check for components, trigger routing selection, set up an order type, apply material staging and confirmation. TS421 (SAP S/4HANA 2021) TS422 (SAP S/4HANA 2021) **Material Requirements Planning in SAP S/4HANA 8% - 12%** Select and apply planning strategies, use the planning table, characterize long-term planning and master production scheduling, outline MRP basics and steps of MRP, and describe lot size procedures. TS421 (SAP S/4HANA 2021) TS422 (SAP S/4HANA 2021) **Introduction to SAP S/4HANA Supply Chain Planning < 8%** Outline both motivation and background of SAP S/4HANA, describe its main components, the lines of business, and the SAP User Experience strategy. TS421 (SAP S/4HANA 2021) TS422 (SAP S/4HANA 2021) **Introduction to SAP S/4HANA Production Planning < 8%** Outline production planning components and functions, differentiate consumption-based planning vs. MRP, outline new trends in production planning. TS421 (SAP S/4HANA 2021) TS422 (SAP S/4HANA 2021) **Advanced Planning in SAP S/4HANA > 12%** Outline the basics and master data of advanced planning, explain tools (alert monitor, detailed scheduling planning board) and advanced planning and detailed scheduling processes, explain planning evaluation concepts TS421 (SAP S/4HANA 2021) TS422 (SAP S/4HANA 2021) **Process Orders in SAP S/4HANA < 8%** Characterize process order

elements and process order processing, determine master data objects for process orders, identify features for Good Manufacturing Practices (GMP). TS421 (SAP S/4HANA 2021) TS422 (SAP S/4HANA 2021) **Master Data in SAP S/4HANA > 12%** Identify and explain production relevant master data, including, but not limited to: bill of material, routing and production version. TS421 (SAP S/4HANA 2021) TS422 (SAP S/4HANA 2021) **Lean Manufacturing in SAP S/4HANA 8% - 12%** Identify repetitive manufacturing specific master data, explain line load planning and confirmation, outline Kanban master data and Kanban processes. TS421 (SAP S/4HANA 2021) TS422 (SAP S/4HANA 2021) **Capacity Planning in SAP S/4HANA 8% - 12%** Outline best practices for using SAP S/4HANA, describe the SAP HANA database concept and new user experience with SAP Fiori, outline the capabilities of embedded analytics. TS421 (SAP S/4HANA 2021) TS422 (SAP S/4HANA 2021)

**NO.42** How can you carry out cost object controlling for production orders?

- \* Milestone-related
- \* Cost-related
- \* Product-related
- \* Order-related

**NO.43** What is a work center hierarchy in planning in SAP S/4HANA?

- \* A group of alternative work centers providing a cumulative available capacity for production.
- \* A group of alternative work centers for production, structured in hierarchy levels by priorities
- \* A group of work centers in a production line being used in sequence for production
- \* A group of work centers in a parallel sequence that is used to split production quantities and work on them in parallel

**NO.44** You want to reduce planning efforts for B/C materials. Which planning procedure do you recommend?

- \* Material requirements planning
- \* Manual planning without check
- \* Forecast planning
- \* Consumption-based planning

**NO.45** Your quality department detect a deviation in a raw material batch. Unfortunately, this batch has already been used in production. How can you identify all affected finish goods stocks?

- \* Use the batch information cockpit.
- \* Use the material staging report.
- \* Use the material where-used report.
- \* Use batch determination.

**NO.46** For which categories can you define BOMs in SAP S/4HANA?

- \* Work Center
- \* Sales order
- \* Class
- \* Document Structure

**NO.47** What does forecasting in demand planning cycle include?

- \* Past quotation quantities
- \* Past sales order quantities
- \* Market intelligence
- \* One-off events
- \* Past procurement quantities

**NO.48** Which of the following is valid sequence of the main activities in production order processing?

- \* Creation, availability check, release, material withdrawal, confirmation
- \* Creation, release, printing, goods issue, confirmation, goods receipt
- \* Creation, printing, release, goods issue, confirmation, goods receipt
- \* Creation, release, settlement, goods issue, confirmation, goods receipt

**NO.49** What are the consequences if the Dispatched operation status is set for a production order operation?

- \* You can reschedule the operation using midpoint scheduling in a planning table.
- \* You can reschedule the operation using finite scheduling in planning table
- \* You can reschedule the operation using lead time scheduling in a planning table
- \* You can reschedule the order using infinite scheduling in a planing table

**NO.50** Why would you use phantom assemblies?

- \* To simplify the structure of bills of materials
- \* To make the assignment of components easier
- \* To reduce the number of changes required in bills of materials
- \* To reduce the number of material masters
- \* To increase the number of planning levels

**NO.51** Your project team decides to use a make-to-order planning strategy for strategic in discrete manufacturing.

What is the impact of this decision?

- \* Net requirement calculation is sales-order specific.
- \* A sales-order-specific planning run is required.
- \* Storage location MRP areas are required.
- \* Production orders specific stock is created

**NO.52** Which of the following elements does MRP take into account during net requirement calculation?

- \* Purchase orders
- \* Lot size
- \* Maximum stock level
- \* Safety stock

**NO.53** Your production planners must execute planning only for specific resources. How can you achieve this in advanced Planning(PP/DS)

- \* Use heuristic.
- \* Use a resource group.
- \* Use a propagation range.
- \* Use a planning group.

**NO.54** Where do you maintain data to determine the duration of an operation for production?

- \* Bill of material (BOM)
- \* Routing
- \* Material master
- \* Work center

**NO.55** What does a line hierarchy in repetitive manufacturing represent?

- \* A production line with a parallel sequence in the routing
- \* A production line with prioritized alternative work centers
- \* A production line with more than one work center

\* A production line with an alternative sequence in the routing

**NO.56** What type of time element can be reduced by strategy settings while dispatching?

- \* Transportation time
- \* Wait time
- \* Queue time
- \* Setup time

**NO.57** You have maintained the parameters for simple discontinuation in the material master of a component. Which business process will be affected if the available stock is zero and the discontinuation date is in the past?

- \* Production order release
- \* Material requirements planning
- \* Backflushing
- \* Kanban

### SAP C\_TS422\_2021 Exam Description:

The "SAP Certified Application Associate - SAP S/4HANA Production Planning and Manufacturing" certification exam validates that the candidate possesses the fundamental and core knowledge required of the SAP S/4HANA Manufacturing consultant profile. This certification proves that the candidate has an overall understanding and in-depth technical skills to participate as a member of a project team in a mentored role.

### Focus on C\_TS422\_2021 All-in-One Exam Guide For Quick Preparation:
