Download Latest PEGAPCSSA87V1 Dumps with Authentic Real Exam Questions Authentic PEGAPCSSA87V1 Exam Dumps PDF - Feb-2023 Updated NEW QUESTION 10

Application Settings allow you to_____.

- * simulate data in an environment for testing purposes
- * automate the application migration process
- * execute connectors in parallel to improve performance
- * store references to an external system connected to an application

NEW QUESTION 11

What are the two most common ways to expose your application to an external system? (Choose Two)

- * Create a connector linked to a data page.
- * Leverage the Pega API.
- * Configure a signed certificate.
- * Create a web service with the Service wizard.

NEW QUESTION 12

A travel reservation servicing case includes a service level for responding to requests. The service level intervals vary according to passenger status, class of service, and fare type.

Which implementation satisfies this requirement?

- * Create a single property circumstanced rule.
- * Create a multivariate circumstanced rule and a when rule.
- * Create a single property circumstanced rule and a when rule.
- * Create a multivariate circumstanced rule, a circumstanced definition, and a circumstanced template.

NEW QUESTION 13

Which two use cases correctly describe controlling access to an attachment category? (Choose Two)

- * Configure the When condition `IsCurrentStageTesting`; to allow users to view an attachment if the rule returns true.
- * Configure a Visible when condition called `IsDocumentPrivate`; to allow users to view an attachment if the rule returns false.
- * Configure the privilege `DeleteOwn`; and assign it to a user so that a user can delete their own attachments.
- * Configure Client-based access control on the class where the attachment category exists to restrict access to the attachment.

NEW QUESTION 14

Select the three Pega best practices for developing activities. (Choose Three)

- * Keep activities short. Limit your activities to fewer than 15 steps.
- * Limit activity calls to at most three to prevent performance problems.
- * Limit custom Java steps whenever possible.
- * Use only activities to support queue processing and interfaces.
- * Limit the use of activities. Use alternative rule types such as data transforms whenever possible.

NEW QUESTION 15

Which two statements are true about configuring Pega Web Mashup? (Choose Two)

- * Use the Integration wizard to generate mashup code for use in other systems
- * Add a list of trusted domains to the application that contains the mashup.
- * Keep the original names of default actions in the mashup code to prevent security risks.
- * Use action objects to transfer data between gadgets in a mashup.

NEW QUESTION 16

A requirement states that the Manager role cannot open a purchase request during the Audit stage. How do you configure the case stage to satisfy this requirement?

- * Apply an Access Deny record.
- * Apply an Access When record.
- * Apply a When record.
- * Apply a Privilege record.

NEW QUESTION 17

Place the steps in the order in which a service processes a request.

Service Steps Order

Request processing
Map inbound data
Inbound request received
Map outbound data
System returns a response

Service Steps Order

1	
2	
3	
4	
5	

Service Steps Order

Request processing
Map inbound data
Inbound request received
Map outbound data
System returns a response

Service Steps Order

1	Request processing
2	Map inbound data
3	Inbound request received
4	Map outbound data
5	System returns a response

NEW QUESTION 18

Your application is deployed to the cloud. A data source outside your application populates a data page by using your data access pattern configuration. You receive complaints that the system takes a long time to fetch data each time the case worker accesses information for a different customer.

Which approach solves this performance issue?

- * Access data page with a predefined key so that, once loaded, data access is faster.
- * Fetch only the targeted data from the database each time data is needed so access is faster.
- * Change snapshot data access method to reference pattern data access method.
- * Move to local installation because network traffic in cloud deployment is often slow.

NEW QUESTION 19

To reduce training requirements for users, a company wants to utilize the existing front end of their application. How can a third-party application use Pega Platform?

- * By using middleware tools in application servers
- * By using database tables for staging the requests
- * By using REST calls from the Pega API
- * By exposing third-party application services

NEW QUESTION 20

A data page is used to retrieve data from an external system. If an error occurs, you want to display a message to the user and send an email to the system administrator.

How do you implement this requirement?

- * Reuse the out-of-the-box Connection Problem error handling flow on the Service tab for the connector. .000
- * Configure an activity's input source as the error message and the output as an email.
- * Configure an error handling process that displays the error message and sends an email.

- * Create an error handler data transform that adds an error message to the data page and sends an email.

NEW QUESTION 21

A fitness organization wants to ensure that data is entered correctly into an online form when users apply for, or update, their membership information.

Which scenario requires an edit validate rule?

- * Existing members must enter their membership number in the correct format, M-#####-0#.
- * The first and last name are required on the form, but a middle name or initial is optional.
- * New members can get a 20% discount, if they enter the Coupon Code SAVE.
- * New members must be at least 18 years of age at the time they sign up for membership.

NEW QUESTION 22

You configure a child case to override the locking strategy of the parent case. The parent case has a time-out value of one hour.

Which time-out value option is recommended for the child case?

- * Set the Access time-out value equal to the parent case time-out value.
- * Set the Access time-out value less than the parent case time-out value.
- * Set the Access time-out value greater than the parent case time-out value.
- * The Access time-out value on the child case cannot be changed.

NEW QUESTION 23

Which two statements are true about database tables in Pega Platform? (Choose Two)

- * The PegaRULES database contains rules while PegaDATA contains work instances.
- * The Database Table rule allows configuration of a connection to a specific table.
- * The History record table contains a record of when each user logged in to the system.
- * The report definition rule should only be used against one table for performance reasons.

NEW QUESTION 24

You should consider using a field value when the list of allowed values is

- * mostly static
- * three or fewer items
- * specific to one case type
- * shared across all case types

NEW QUESTION 25

A hospital uses a Patient visit case type to track patient visits to the Emergency Room (ER).

The case type can create Lab analysis and Diagnostic imaging child cases.

While the child cases are active, the attending doctor or nurse must be able to update the patient visit case with notes and treatment recommendations.

In the Answer Area, select the configurations which allow a doctor or nurse to update the parent case while lab and imaging technologists perform assignments on their respective child cases.

Answer Area

Case Types	Configuration
Patient visit	Allow multiple users ▼
Lab analysis	Allow other users to open the parent ca... ▼
Diagnostic imaging	Allow other users to open the parent ca... ▼

NEW QUESTION 26

The current version of an application lists ABC:02-02 as an application ruleset. The ruleset versions listed in the Answer Area are also present on the system.

In the Answer Area, identify the ruleset versions that the skim operation considers when you perform a major version ruleset skim on ruleset ABC.

Ruleset Version	Will the ruleset version be skimmed?
01-01-01	<input type="text"/> Yes No
02-01-01	<input type="text"/> Yes No
02-02-01	<input type="text"/> Yes No
02-01-05	<input type="text"/> Yes No

Ruleset Version	Will the ruleset version be skimmed?
01-01-01	<input type="text"/> Yes <input checked="" type="text"/> No
02-01-01	<input type="text"/> <input checked="" type="text"/> Yes No
02-02-01	<input type="text"/> Yes <input checked="" type="text"/> No
02-01-05	<input type="text"/> <input checked="" type="text"/> Yes No

NEW QUESTION 27

You want to create a new minor version of an application ruleset to add a new feature to your application. The new feature will be made available to users in a phased rollout.

How do you update the application to add the new ruleset version?

- * Create a branch ruleset and a new application, and add the branch ruleset to the application.
- * Lock and roll the existing ruleset, and create a new application version.
- * Lock and roll the existing ruleset, and update the existing application version.
- * Create a new application version and add the new ruleset version as a production ruleset.

NEW QUESTION 28

A city resident can report potholes to the Department of Transportation by logging in to a mobile Pega Platform application that utilizes the Pega API.

Which two Pega API interactions do you use to facilitate this? (Choose Two)

- * Access the related case type to report using GET/casetypes
- * Log into the application using PUT/authenticate
- * Submit the report using POST/cases
- * Update the report using GET/cases

NEW QUESTION 29

An application contains a flow action with the Apply to: class of TRB-HRApps-Work-Feedback in a locked ruleset, HRApps:01-01-01. There is a higher unlocked ruleset.

In the Answer area, select the appropriate settings on a saved copy of the flow action that prevents the application from using the rule in HRApps: 01-01-01.

Ruleset version	HRApps:01-01-01
Applies to	TRB-HRApps-Work-Feedback
Availability	Withdrawn

Ruleset version	Ruleset version
Applies to	Applies to
Availability	Availability

NEW QUESTION 30

Which three items are generated and displayed in the compliance score of an application? (Choose three.)

- * Rules with warnings in the application
- * Pega Platform core rules used in the application
- * Rules with unjustified warnings in the application
- * Unweighted compliance score
- * Percentage of compliant rules in the application

NEW QUESTION 31

An application includes the following set of circumstanced instances of a decision table.

Class

Ruleset

Version

circumstance

MyCo-Account Manage-Work-AccountOpen

Ruleset

MyCo-Account Manage-Work-AccountOpen

Account Manage

01-01-01

01-01-05

Circumstance

AccountManage

None

Status=“Silver”

MyCo-Account Manage-Work-AccountOpen AccountManage

01-01-05

01-01-15

Status=”Gold”

MyCo-Account Manage-Work-AccountOpen AccountManage

Status=”Platinum

Status=”Silver”

MyCo-Account Manage-Work-AccountOpen Account Manage

Version

01-01-15

You update the application and increment the Account Manage ruleset version to 01.02-01. As part of this update, the circumstance .Status=”Silver” is no longer needed by the application.

How do you implement this change?

- * Create a new version of the circumstanced decision table in Account Manage: 01-02-01 and set the availability of the rule to Withdrawn.
- * Do nothing. Rule resolution does not consider rules in a lower minor version of a ruleset.
- * Create a new version of the circumstanced decision table in Account Manage:01-02-01 and set the availability of the rule to Blocked.
- * Create a new version of the circumstanced decision table in Account Manage: 01-02-01 and select the Base rule option.

NEW QUESTION 32

Which two configurations are required when adding a Split for Each shape to your case life cycle? (Choose Two)

- * Enter a rule that stores the audit note that you want to include in the subprocess
- * Define when the parent process resumes processing
- * Enter the Page List or Page Group property that is the basis of the split
- * Enable users to get back to the subprocess after the case moves forward

NEW QUESTION 33

Consider the following requirement: An auditing policy explicitly requires that employees cannot see the contents of complaints made against themselves.

Which security solution do you use to satisfy the requirement?

- * Access of Role to Object
- * Access Control Policy
- * Access When
- * Access Deny

NEW QUESTION 34

An assignment service-level agreement (SLA) is configured with the following details:

- * Initial urgency: 20
- * Assignment ready: Timed delay of 2 hours
- * Goal: 5 hours and increase urgency by 10
- * Deadline: 2 hours and increase urgency by 25
- * Passed deadline: 1 hour, increase urgency by 5, and limit events to 6 The case reaches the assignment at 9 AM on Wednesday.

Assuming no other urgency adjustments, what is the assignment urgency 6.5 hours after the case reaches the assignment?

- * 85
- * 95
- * 75
- * 80

Pegasystems PEGAPCSSA87V1 Exam Syllabus Topics:

TopicDetailsTopic 1- Address integration errors in connectors- Circumstance rules on a single variable or multiple variablesTopic 2 - Design reports with multiple sources; associations and joins- Measure System Performance; use of performance-related toolsTopic 3- Design applications for mobile use; use of certificate sets- Configure flow action pre- and post- processingTopic 4- Configure Pega Web Mashup authentication- Configure and validate application rulesetsTopic 5- Identify the role and impacts of application versioning; Use of ruleset skimming- Branch rulesets for parallel developmentTopic 6- Differentiate between a queue processor and a job scheduler- Create an application with the New Application wizardTopic 7- Differentiate between the delivery options for mobile devices- Organize and manage case attachmentsTopic 8- Automate actions when a property value changes- Define the Enterprise Class StructureTopic 9- Identify how circumstancing affects application behavior- Migrate an application; use of product rulesTopic 10- Differentiate between work groups, work queues, and organizational structures- Extend service-level agreement configurationsTopic 11- Expose an application with a web service- Understand the rule resolution process; adjust rule availabilityTopic 12- Review log files: Distinguish system events and performance events- Identify the role and elements of activities in case processing
