Reliable Study Materials & Testing Engine for C-HANATEC-17 Exam Success!

Q93. Which prerequisites have to be fulfilled before you reset a database migration option (DMO) procedure?

There are 2 correct answers in this question.

- * The SUM folder needs to exist.
- * The source database is up and running.
- * The DMO procedure hasn't reached downtime yet.
- * A cleanup has already been triggered.

Q94. Which role do you need in order to assign users to groups in the SAP HANA cockpit?

Please choose the correct answer.

- * Cockpit User Role
- * Cockpit Administrator Role
- * Cockpit User Administrator Role
- * Cockpit Database Administrator Role

Q95. How can you minimize the database migration option (DMO) downtime?

- * Run the benchmarking tool parallel to the DMO to automatically adjust the number of R3load processes
- * Use the benchmarking tool for a productive database migration with the DMO procedure
- * Provide the measured table migration duration for table sequencing during benchmarking
- * Adjust the number of R3load processes during benchmarking and the DMO procedure

Q96. Which system usage types are automatically assigned to ties in the SAP HANA cockpit?

There are 3 correct answers to this question.

- * Test
- * Development
- * Production
- * Quality assurance
- * Custom

Q97. What are the prerequisites for using the Web user interface for HDBLCM? There are 2 correct answers to this question.

- * The SAP HANA database is revision 90 or higher
- * The communication port 1329 is open
- * Internet Explorer – Version 8 or higher
- * The communication port 1129 is open

Q98. You register a new resource in SAP HANA cockpit 2.0. What prerequisite does the resource require?

- * A user with CATALOG READ privileges and SELECT on _SYS_STATISTICS schema
- * A user with DATA ADMIN privileges and SELECT on _SYS_TELEMETRY schema
- * A multitenant configuration with SYSTEMDB
- * The target database on SAP HANA 2.0 SPS00 or higher

Q99. Which SAP HANA database service can you stop from the system database? There are 2 correct answers to this question

- * Preprocessor
- * Index server
- * XS Engine
- * Compile server

Q100. Which actions take place during a database migration option (DMO) procedure when performing an in-place migration?

There are 2 correct answers to this question.

- * One table is migrated per R3load pair.
- * TABART is considered for the creation of R3load control files.
- * SAP up decides which tables to split.
- * De-pooling of tables is done during the procedure.

Q101. How can you perform a complete back up of an SAP HANA database system? Please choose the correct answer.

- * Back up the system database and all tenant databases individually.
- * Back up the system database and all tenant databases in one step.
- * Back up the complete database system.
- * Backup the complete storage system.

Q102. Which services can you stop in the SAP HANA cockpit from the SYSTEMDB Manage Services app?

There are 2 correct answers to this question.

- * Daemon
- * Preprocessor
- * Index server
- * Compile server

Q103. Out of complete SAP HANA platform, which from the following components are not part of SAP HANA Database? There are 3 correct answers to this question.

- * HWCCT
- * Database Services
- * Smart Data Access
- * INA file loader
- * EPM Services

Q104. What is the correct sequence of the following four steps in the restart of the SAP HANA database system? Please choose the correct answer.

- * Aborted transactions are rolled back. 2. Open transactions are recovered. 3. Row tables are loaded into memory. 4. Column tables are loaded.
- * Aborted transactions are rolled back.
- * Row tables are loaded into memory. 3. Open transactions are recovered. 4. Column tables are loaded.
- * Row tables are loaded into memory. 2. Column tables are loaded. 3. Open transactions are recovered. 4. Aborted transactions are rolled back.
- * Row tables are loaded into memory. 2. Open transactions are recovered. 3. Aborted transactions are rolled back. 4. Column tables are loaded.

Q105. Your customer asks you to set up alert monitoring in SAP HANA cockpit 2.0. Which alert properties can you configure?

There are 2 correct answers to this question.

- * Proposed solution
- * Schedule activation
- * Threshold values
- * Check interval

Q106. Which backup scenarios are allowed in multitenant database containers? Note: There are 2 correct answers.

- * The system database can initiate its own backup and the backup of tenant databases
- * A backup of a tenant database can be recovered to an SAP HANA single-container system
- * The system database should be recovered first in order to recover the tenant databases
- * A tenant database can initiate its own backup unless this is prohibited by the system configuration

Q107. Which diagnostic file can you use to monitor the status of database recovery?

- * backint.log
- * backup.log
- * sapstartsrv.log
- * available.log

Q108. How can the system database administrator disable tenant database functionalities? Please choose the correct answer.

- * Using the hdbuserstore tool
- * Using the resident hdblcm tool
- * Using the Manage Restricted Features app
- * Using the Manage Blacklisted Parameter app

Q109. Which steps can be combined in a DMO procedure, targeting an AS ABAP 7.50 based SAP system? There are 2 correct answers to this question.

- * Migrating to a target database, g. SAP HANA
- * Performing an SAP software update
- * Performing a Unicode conversion
- * Performing a database upgrade of the source database

Q110. Which preparation tasks do you need to perform before starting the Database Migration Option (DMO) procedure? There are 2 correct answers to this question.

- * Move the latest R3trans update archive into the download folder.
- * Extract the SAP HANA database software installation archive.
- * Check if the latest SPAM/SAINT update is applied.
- * Update the SAP Host Agent to the latest version

Q111. In which of the following SAP HANA scenarios is it recommended to encrypt communication between the client software and SAP HANA? There are 2 correct answers to this question.

- * SAP HANA as a data mart for reporting and analytics.
- * SAP HANA as a platform for providing database and application services to native SAP HANA-based applications.
- * SAP HANA as a classic three-tier architecture as the primary database (for example. SAP NetWeaver Business Warehouse, SAP Business Suite Installation).

Q112. Which default users will be created during the installation of the SAP HANA database system? There are 2 correct answers to this question.

- * <sid>crypt
- * sap<sid>
- * Idapadm
- * sapadm

Q113. You must design a high-availability SAP HANA database system with 8 hosts (6 worker and 2 standby) that also uses multitenant database containers. Which rules apply?

There are 2 correct answers to this question.

- * The system database must run on the standby host.
- * The system database instance must run on all hosts (worker and standby).
- * The tenant databases must be able to be scaled out to all hosts (worker and standby).
- * The tenant databases must run on the worker hosts.

Q114. Your customer has purchased a 3 TB SAP HANA license. To which value do you set the GLOBAL_ALLOCATION_LIMIT parameter when you have four 2TB nodes in an SAP HANA scale-out system with three worker and one standby nodes?

Please choose the correct answer.

- * 1TB
- * 0.5 TB
- * 3 TB
- * 1.5 TB

Q115. Which certificates can you manage in SAP HANA cockpit 2.0? There are 2 correct answers to this question.

- * Kerberos
- * SAML

- * PKCS #12
- * X.509

Q116. Why are repository roles preferred over catalog roles? Note: There are 2 correct answers.

- * They are created by the technical user
- * They are revoked if the database user that granted them is deleted.
- * They are transportable runtime objects
- * They are transportable design-time objects

Q117. After you start the SAP HANA database, what does the system do to ensure that it is in a consistent mode?

- * It determines and rolls forward aborted transactions
- * It rolls back write transactions that were open when the database was stopped
- * It reloads a savepoint with the restored consistent state of the database
- * It rolls back changes of committed transactions that were NOT written to the data area

Brief Overview of the benefits of SAP C_HANATEC_17 Exam certified professional?

There are different benefits of SAP C_HANATEC_17 certified professional. It provides a great platform for professionals. SAP C_HANATEC_17 certification helps you in getting a good job that has a better pay package in the market. In fact, SAP C_HANATEC_17 certification helps you in making your career and life easy. SAP C_HANATEC_17 certification helps you in achieving success in your career. You can achieve great things with SAP C_HANATEC_17 certification. **SAP C_HANATEC_17 Dumps** is a platform that will help you in becoming successful. Indeed, it will help you in becoming an expert in the field of SAP HANA. It will help you in improving your career and life. Times are changing very fast. In fact, there are a lot of new technologies coming up in the market. So, you need to update yourself with the latest technology in order to become successful.
