[2023] E-C4HYCP-12 Exam Dumps, Test Engine Practice Test Questions
Pass E-C4HYCP-12 exam [Apr 26, 2023] Updated 40 Questions

E-C4HYCP-12 Exam Certification Details:

Exam:40 questions Languages:English Level:Specialist Cut Score:60% Duration:90 mins

SAP E-C4HYCP-12 Certification Exam Topics:

Topic Areas Topic Details, Courses, Books **Integration > 12%** Connect the omni-commerce capabilities of SAP Commerce Cloud with other SAP products Integration and Data Management Intelligent Selling Service Integration Options **General Support > 12%** Use the different features, extensions and add-ons of the SAP Commerce Suite; use other platform Core features. Solution Architecture Architecture Overview Order Management Security and User Management LDAP Extension Transparent Attribute Encryption Single Sign-On in Backoffice **Troubleshooting > 12%** Troubleshoot issues with the SAP Commerce Suite (i.e. databases, clusters and cockpits). Troubleshooting Suggestions **Product Support Processes > 12%** Identify the scope of SAP Product Support and SLAs, and describe Product Support processes (i.e. incident escalation, bug fix and patch process). Application Management After Hours Support Support Searching for Known Issues Support Communication Guidelines Priority Levels Definition

NO.11 What must you do when you provide a workaround for a code glitch in an existing service, for example, ProductService?Note: There are 3 correct answers to this question.

- * Modify the existing bean definition with the new service.
- * Add a new bean definition with a new ID for the new service.
- * Implement a new custom service by extending the existing service.
- * Override the alias of the original bean definition.
- * Replace all injections with a new ID for the new service.

NO.12 What are some of the benefits of using Service Layer Direct?Note: There are 3 correct answers to this question.

- * It allows you to read data from and write data to the database.
- * It bypasses the Jalo layer completely to persist data in the database.
- * It works for global sessions and for current sessions.
- * It combines the Jalo layer and service layer.
- * It bypasses the interceptors to persist data in the database.

NO.13 Which of the following does Product Support consider to be a workaround?Note: There are 2 correct answers to this question.

- * The support engineer provides guidelines on how to implement and configure a custom Spring bean overriding the default behavior in SAP Commerce.
- * The support engineer provides an alternative solution that resolves at least the basic processes of the affected feature.
- * The support engineer provides the customer with the official SAP Commerce patch that includes the fix.
- * The support engineer provides guidelines on how to modify the code of the affected feature.

NO.14 What happens when you set the impex.legacy.mode property to True?Note: There are 2 correct answers to this question.

- * The ServiceLayer interceptors and validators are triggered during the import/export process.
- * The INSERT, UPDATE, and REMOVE operations are performed by the ModelService during the import.
- * The ServiceLayer interceptors and validators are NOT triggered during the import/export process.
- * The INSERT, UPDATE, and REMOVE operations are NOT performed by the ModelService during the import.

NO.15 Your customer reports an incident where the SAP Commerce system crashes in production.What would you ask for?Note: There are 2 correct answers to this question.

- * The specific scenario to reproduce the issue
- * The thread dumps taken right before the crash
- * The database dump from the production system
- * The thread dumps taken after the system reboot

NO.16 How can you avoid bottlenecks in the SAP Commerce platform?Note: There are 2 correct answers to this question.

- * Switch off relations ordering to improve the performance of the import and the synchronization.
- * Avoid using the lazy-loading mechanism when coding in the development phase.
- * Schedule a regular cleanup of the props table.
- * Check the average number of items per second imported by ImpEx to validate that the cache size is sufficient.

NO.17 A customer reports a performance problem with DefaultStockService. After checking the customer's system by running SELECT COUNT(*) FROM {StockLevelHistoryEntry}, you discover that there are hundreds of millions of instances of StockLevelHistoryEntry.What would you do to resolve this performance issue?Note: There are 2 correct answers to this question.

- * Delete the content of the StockLevelHistoryEntry table directly from the database to immediately improve performance.
- * Implement a CronJob that will clean the StockLevelHistoryEntry table according to customer business needs.
- * Suggest an improvement by creating a maintenance request for the customer.

- * Run Cleanup Type System in the SAP Commerce Administration Console.

NO.18 How are bug fixes provided to partners and customers?

- * SAP Commerce delivers small jar archives called Hot Fix for the extension that fixes a specific bug.
- * SAP Commerce provides an extension that contains bug fixes.
- * SAP Commerce provides SAP Notes with code corrections describing the best way to fix a specific bug.
- * SAP Commerce provides a patch release that contains only bug fixes and security patches.

NO.19 Which ImpEx headers can you use to update an SAP Commerce Cloud item?Note: There are 2 correct answers to this question.

- * INSERT_UPDATE UserGroup;UID[unique=true];locname[lang=en];locname[lang=de];groups(uid)[mode=append]
- * INSERT_UPDATE UserGroup;UID[unique=true];locname[lang=en];locname[lang=de];groups(uid)[mode=append]
- * UPDATE UserGroup;UID[unique=true];locname;groups(uid)[mode=append]
- * INSERT_UPDATE UserGroup;UID;locname;groups(uid)[mode=append]

NO.20 What must you configure when you use the iFlow?Note: There are 2 correct answers to this question.

- * Set iFlow authentication type to certificate-based.
- * Set the receiver address setting and proxy type setting of the iFlow.
- * Assign the AuthGroup.IntegrationDeveloper role to the SAP Commerce user.
- * Assign the AuthGroup.IntegrationDeveloper role to the SAP Cloud Integration tenant.

NO.21 What must you do when you configure the OAuth2 for SAP Cloud Integration?Note: There are 3 correct answers to this question.

- * Assign ROLE_CLIENT or ROLE_TRUSTED_CLIENT in the SAP Commerce Backoffice.
- * Configure the token endpoint URL in the SAP BTP cockpit.
- * Assign the ESBMessaging.Send role in the SAP Commerce Backoffice.
- * Run an ImpEx to import the OAuthClientDetails and ExposedOAuthCredential type data in the SAP Commerce Backoffice.
- * Create the secret client credentials in the SAP Commerce Backoffice.

NO.22 When you troubleshoot a catalog synchronization issue, which files do you check first?Note: There are 3 correct answers to this question.

- * Sync Media dump files
- * Database dump files
- * localextensions.xml file
- * JDBC log files
- * local.properties file

NO.23 Which benefits does SAP BTP Extensions integration provide?Note: There are 2 correct answers to this question.

- * A customization layer for SAP Commerce Cloud that depends on the API Registry module
- * An alternative and independent application to SAP Commerce Cloud based on the backoffice
- * An analysis layer to capture customer interactions, contexts, and behaviors for future processing
- * Microservices that customize the standard functions of SAP Commerce Cloud without compromising on upgradability

NO.24 SAP Commerce receives a Java OOM (out of memory) exception.What should you do first?Note: There are 2 correct answers to this question.

- * Analyze the gc.log file for object allocation.
- * Take a Java heap dump when the issue is detected.
- * Analyze the access.log file for frequent requests.
- * Increase the memory size.

NO.25 What does SAP Commerce Cloud, context-driven services capture?Note: There are 3 correct answers to this question.

- * Data replication events
- * Outgoing requests from SAP Commerce to external services
- * Click events, order events, and address book event updates
- * Quantity updates in the shopping cart
- * All customer interactions and behaviors

NO.26 Which of the following cases should you treat as a support incident?Note: There are 2 correct answers to this question.

- * A partner contacts Product Support for assistance with a custom solution.
- * A partner contacts Product Support regarding a platform with slow performance.
- * A partner requests information on how to customize the backoffice.
- * A partner needs specialized advice regarding the architectural aspects of a project.
