**NO.108** Universal Containers (UC) has a custom Apex class that enforces a business process and updates opportunities. UC has noticed that fields with field level security permission of read only on certain users' profiles are being updated by this class.

How should the architect fix this problem?

- \* Add With Sharing keyword to the class,
- \* Put the code in an inner class that uses the With Sharing keyword.
- \* Use the IsUpdateable() Apex method to test each field prior to allowing update.
- \* Use the WITH SECURITY\_ENFORCED keyword in the SOQL statement.

**NO.109** Universal Health is planning to store patient notes in Salesforce. Patient notes consist of long text notes taken by a user to document phone calls with a patient.

A data audit has identified that these notes can contain Personally Identifiable Information (PII) and Personal Health Information (PHI). The regulatory requirements state that this data must be encrypted at rest as well as in transit.

What should the Architect do in order to make sure Universal Health stays compliant?

- \* No action is required; all Salesforce data is encrypted at rest as part of Salesforce's standard trust measures.
- \* Enable Salesforce Shield Platform Data Encryption and mark the patient notes field as encrypted.
- \* Create a new Custom Field of type Text (Encrypted) and move the patient notes data into the new field.
- \* Use an Apex trigger and the Apex Crypto class to encrypt patient notes as soon as they are saved to Salesforce.

**NO.110** Universal Containers (UC) service reps are assigned to a profile which has View All; in Case object (Private OWD). To make sure service reps have access to all relevant information to attend to customer requests, which two details should a Salesforce Architect consider? Choose 2 answers:

- \* Service reps will be able to access all UC contact records if they are controlled by parent.
- \* Service reps will not be able to access all UC contact records if they are controlled by parent.
- \* Service reps will be able to access all the UC Account records due to Implicit Sharing.
- \* Service reps will not be able to access all the UC Account records because Account OWD is private.

**NO.111** The system administrator of Cosmic Solutions recently created a custom profile for sales users that allows them to view and edit the records of a custom object called Shipment;. There are more than 100 sales users in the company. The Sales Director has now informed the administrator that five of those users should not be able to edit any Shipment records. What should a Solution Architect recommend for the requirement? Choose 1 answer.

- \* Edit the existing custom profile assigned to the sales users and remove Edit; access to the Shipment; object.
- \* Create a sharing rule that grants only Read; access to the records of the Shipment; object.
- \* Create a new profile without Edit; access to the Shipment; object and assign it to the five users.
- \* Create a permission set without Edit; access to the Shipment; object and assign it to the five

**NO.112** Universal Container (UC) wants all full-time internal employees to be able to view all leads. A subset of employees should also be able to see leads.

Which organization default (OWD) approach should an architect recommend that will help US implement these requirements?

- \* Implement a Public Read/write OWD on Lead
- \* Implement a Public Read only OWD on Lead
- \* Implement a Public Read/write/Transfer OWD on Lead.
- \* Implement a Private OWD on Lead.

**NO.113** Which are two valid use cases for programmatic sharing?

Choose 2 answers.

- \* An external system manages user record access.
- \* Frequent user ownership changes based on re-alignments.
- \* Native sharing functionality does not meet requirements.
- \* Setting user ownership for standard and custom objects.

**NO.114** Universal Containers has recently implemented Enterprise Territory Management to better align their sales teams and sales processes. They are in Q4 of their fiscal year and they have completely revamped their Territory structure and created a plan for a new structure that would support the new fiscal year. Their current territory model has 8,000 territories. Their new model would be a new set of 8,500 territories, and their org limit is 10,000 territories.

Which Enterprise Territory Management feature can Universal Containers take advantage of in order to help them stay within their org limits?

- \* Territory Hierarchy

- \* Territory Model State
- \* Territory Type
- \* Territory Type Priority

**NO.115** Cloud Kicks uses Group Maintenance tables.

Which two access grants are stored in these tables? (Choose two.)

- \* Implicit grants
- \* Explicit grants
- \* Group Membership grants
- \* Inherited access grants

**NO.116** Universal Containers has Public ReadOnly sharing settings on the Opportunity object. What opty access options can the user see while adding account team members to Account

- \* Private and ReadOnly
- \* ReadOnly and Read/Wrote
- \* Private
- \* ReadOnly

**NO.117** Universal Containers (UC) delivers training in 500 different regions. The UC Operations Users team manage course setup, scheduling, and trainer setup. The Operations Users team members work at a regional level and report to an Operations manager. The Operations manager requested access to edit ALL scheduled courses owned by the Operation Users team.

How can this be achieved?

- \* The Operations manager will get access to the scheduled courses by granting the Operations manager modify ALL on scheduled courses.
- \* The Operations manager will get access to the scheduled courses owned by the Operations Users team defined in the role hierarchy.
- \* The Operations manager will get access to the scheduled courses by creating an ownership-based sharing rule and share the scheduled courses with the Operations manager.
- \* The Operations manager will get access to the scheduled courses by creating a public group and add the Operations manager and the Operations Users team to the public group

**NO.118** Universal Containers (UC) turned off the customer visibility feature in its customer community. What community functionality is impacted by having the customer user visibility turned off?

- \* Searching for the external users.
- \* Updating their user profile.
- \* Creating new customer community users.
- \* Searching for internal users.

**NO.119** Universal Containers uses 75,000 distributors that have close to 1 million total users. Distributors need opportunities assigned to the distributor for delivery.

What license recommendation will meet distributor needs?

- \* Sales Cloud
- \* Customer Community Plus
- \* Partner Community
- \* Customer Community

**NO.120** Which two options provide implicit record access to users? Choose 2 answers

- \* Read-only access to parent account for a user, based on a criteria-based sharing rule
- \* Read-only access to parent account for a user with access to a child case
- \* Access to child opportunities for the owner of the parent account
- \* Access to related leads for the owner of the parent campaign

**NO.121** Which three capabilities are available with Enterprise Territory Management? Choose 3 answers

- \* Create a public group with Territory
- \* Share a report or dashboard folder with a Territory
- \* Metadata API Support
- \* Integration with Collaborative Forecasting
- \* Assignment of Territory on Opportunities

**NO.122** Universal Containers would like to create a custom team solution that can be used on a custom Loan object. The following requirements must be met:

The Loan custom object should be set to Private in the Org-Wide Defaults.

Any user added to the Custom Team object should have Read Only access to the corresponding Loan record. If the Custom Team record is marked as **Primary**; then the corresponding user should have Read/Edit access to the corresponding Loan record.

Which two methods will allow the Architect to meet the requirements?

Choose 2 answers.

- \* Create a custom trigger on the Custom Team object that inserts or updates records in the Loan\_share object.
- \* Create a criteria-based sharing rule on the Loan object that will share the Loan record with the appropriate user in the Custom Team object.
- \* Create Apex Sharing Reasons on the Loan object to identify the reason the Loan record was share.
- \* Create an owner-based sharing rule on the Custom Team object that will share the Loan record to the owner of the Custom Team record.

**NO.123** At Universal Containers, the Sales VP likes to re-assign Opportunity Teams every six months. Each Opportunity Team has the following resources:

• AE (owner)

• Sales Engineer

-Vertical Overlay

• Sales Ops

What should the Architect use to re-assign Opportunity Team members so they have access to the appropriate Opportunity records?

Choose one answer:

- \* From the User Setup menu, click **Update Team members on open Opportunities**;
- \* Build a Visualforce page that will query the default team and update open Opportunities.
- \* From the Opportunity record detail page, use the **Update Team Members** function.
- \* Use the Mass Reassign Opportunity Team wizard on the Opportunity Tab Home Page.
