

2023 Valid H35-210_V2.5-ENU FREE EXAM DUMPS QUESTIONS & ANSWERS [Q142-Q160]

2023 Valid H35-210_V2.5-ENU FREE EXAM DUMPS QUESTIONS & ANSWERS

Free H35-210_V2.5-ENU Exam Braindumps Huawei Practice Exam

The Huawei H35-210_V2.5-ENU exam is an essential certification exam for IT professionals who want to validate their skills and knowledge in HCIA-Access V2.5. The exam covers a wide range of topics, and the candidates need to have a good understanding of access network technologies, access network protocols, and access network security. The certification is recognized worldwide and can enhance the career prospects of the IT professionals. The candidates can prepare for the exam through self-study, training courses, and practice exams.

The Huawei H35-210_V2.5-ENU exam is one of the most popular certification exams in the IT industry. It is recognized worldwide and is a valuable addition to the resume of IT professionals. The certification exam is an excellent way to demonstrate the expertise and knowledge of the candidate in HCIA-Access V2.5. It is also an excellent way to enhance the career prospects of the IT professionals and can lead to better job opportunities and higher salaries.

Q142. The value of the PROTOCOL field of the PPP protocol is 8021, what is the protocol represented?

- * LCP
- * IPCP
- * IP
- * IPX

Q143. Is the following description correct? MAC The address is generally from each manufacturer IEEE You can buy it, but you can also specify it yourself.

- * True
- * False

Q144. Is the following description correct? The MA5612 provides a serial port. During the normal operation of the device, this port supports the external connection of the CONSOLE and ETH integrated interface cable, and is used as a maintenance serial port and a maintenance network port at the same time.

- * True
- * False

Q145. Which of the following UA5000 boards can support ADSL services?

- * VDMB
- * CSRB
- * SDLE
- * A32

Q146. What are the VLAN attributes supported by MA5680T?

- * Common
- * QinQ
- * MuX
- * Stacking

Q147. Generally speaking, which of the following does not belong to the splitting ratio of the optical splitter in the PON? (Multiple choice)

- * 1:8
- * 1:18
- * 1:14
- * 1:4

Q148. When querying the status of the board, which of the following board statuses need to be processed to ensure that the board can be used normally? (Multiple choice)

- * Normal
- * Auto_load
- * Auto_find
- * Failed

Q149. Regarding the MA5600T/MA5680T Ethernet access service board, which of the following statements is correct?

- * Both H801ETHA and H801ETHB support Ethernet cascading and Ethernet uplink
- * H801ETHA supports Ethernet cascading and Ethernet uplink
- * H801ETHB supports Ethernet cascading and Ethernet uplink
- * None of the above

Q150. Is the following description correct? The OLT supports directly copying the user message priority as the priority of

forwarding messages, and also supports the local setting of the priority directly on the OLT.

- * True
- * False

Q151. Regarding the ATM network, which one of the following descriptions is wrong?

- * Support fixed-length exchange
- * Working in the network layer of the OSI model
- * Reduce the processing time of intermediate nodes and support high-speed transmission
- * Can guarantee the quality of service performance index (QOS) of various businesses

Q152. The international professional organization responsible for allocating IP addresses has divided several network segments as private network segments, which can be freely distributed and used by people on private networks .

Which of the following is not a network segment of private addresses?

- * 10.0.0.0/8
- * 172.16.0.0/16
- * 192.168.0.0/16
- * 224.0.0.0/8

Q153. OneVLANWhat kind of domain can it be regarded as?

- * Conflict domain
- * Broadcast domain
- * Management domain
- * Physical area

Q154. In the ODN network, which of the following protection methods can only protect the backbone fiber? (Multiple choice)

- * TypeB dual-homing protection
- * TypeC dual-homing protection
- * Typec single-homing protection
- * TypeB single-homing protection

Q155. When testing the average transmit optical power of an optical interface, which of the following descriptions are incorrect?

- * The optical fiber connector and the optical connector on the optical interface board panel are clean and well connected
- * The optical power meter is calibrated
- * Connect one end of the test pigtail of the optical power meter to the Rx port of the optical interface board, and connect the other end of the pigtail to the optical power meter.
- * Repeat several times to check whether the maximum and minimum measured average transmit optical power meet the technical requirements.

Q156. What are the parameters required for setting up the network management workstation? (Multiple choice)

- * IP address
- * Routing
- * name
- * Group name

Q157. Which bit in the Flags field of an IP packet indicates whether the packet can be fragmented?

- * MF
- * DF
- * ToS
- * Reserved bit 0

Q158. What is the number of ADSL2+ subbands?

- * 256
- * 512
- * 128
- * 384

Q159. The UA5000 narrowband main control board PVM and the broadband main control board IPM are jointly networked and provide voice services and broadband services at the same time. The voice services are transmitted to the IPM single board through the internal IP channel, and then transmitted by the upstream interface of the IPM single board.

To the upper network, which command should be used to configure the system networking mode at this time?

- * uplink tps on
- * uplink tps off
- * working mode integrated
- * working mode alone

Q160. Compared with the template mode, when the MA5600T configures FTTH services in a simplified manner, which of the following steps does not require configuration?

- * Configure traffic template
- * Configure the DBA template
- * Configure the line template
- * Configure business templates
