

Pass Huawei H19-338-ENU Exam Quickly With Actualtests4sure [Q17-Q34]

Pass Huawei H19-338-ENU Exam Quickly With Actualtests4sure
Prepare H19-338-ENU Question Answers - H19-338-ENU Exam Dumps

Huawei H19-338-ENU (HCPP-Storage) Certification Exam is a vendor-specific certification that is recognized globally. It is an essential certification for professionals who work with Huawei storage products and solutions in their daily work. By passing H19-338-ENU exam, candidates can demonstrate their proficiency in Huawei storage technology and their ability to design, implement, and troubleshoot Huawei storage solutions efficiently.

Huawei HCPP-Storage certification is recognized globally and is highly valued by organizations looking for professionals with expertise in storage technology. HCPP-Storage certification exam is conducted online and can be taken from anywhere in the world. H19-338-ENU exam consists of 60 multiple-choice questions and is of 90 minutes duration. Candidates who score at least 60% marks in the exam are awarded the Huawei HCPP-Storage certification.

QUESTION 17

Which product family of Dell EMC can be connected to IBM mainframe servers?

- * Unity
- * Isilon
- * PowerMax 8000
- * PowerMax 2000

QUESTION 18

Dorado V6 supports both scale-out and scale-up.

- * True
- * False

QUESTION 19

Which software architecture does the OceanStor V5 use?

- * Parallel block and FS architecture
- * FS-based block architecture
- * Block-based FS architecture

QUESTION 20

Before the PoC test for Dorado V3, which of the following statements about Dorado V3 test is true (same with Dorado V6)?

- * We need to collect the host type and version.
- * We need to collect the application type of example, database, VDF, etc.
- * We should try to collect the I/O block size from application. Then we can select a suitable I/O block size when we create LUNs.
- * All of the above.

QUESTION 21

Which statement about the Dorado's global garbage collection (GC) are correct? (Multiple choice)

- * Dorado supports intelligent adjustment of multiple GC levels based on the garbage percentage and CPU usage.
- * When a conflict occurs, user I/Os and metadata always have a higher priority than GC.
- * Global GC issues TRIM commands to trigger GC on SSDs.

QUESTION 22

Which problems can continuous mirroring solve? (Multiple Choice)

- * Two controllers fail at the same time
- * Two controllers fail at an interval of 20 minutes.
- * Two controllers fail at an interval of 10 seconds.
- * The customer has not replaced it within 10 days after the controller fails.

QUESTION 23

Which of the following consistency groups (CGs) can be created based on protected groups of Dorado V6? (Multiple choice)

- * Clone CG
- * Asynchronous remote replication CG
- * Snapshot CG
- * HyperMetro CG e. 3DC CG

QUESTION 24

Which method can be used to upgrade a Dorado active-active (HyperMetro) solution to a 3DC solution?

- * Synchronous replication
- * Active-active
- * Asynchronous replication
- * Volume mirroring

QUESTION 25

Which statement about the DR star for OceanStor V5 is true? (Multiple choice)

- * Active-active + asynchronous replication + asynchronous replication (standby).
- * Asynchronous replication + asynchronous replication + asynchronous replication (standby)
- * Synchronous + asynchronous replication + asynchronous replication (standby)

QUESTION 26

Which replication link types do Huawei active-active (HyperMetro) solution support? (Multiple choice)

- * Fiber Channel
- * IP
- * InfiniBand
- * SAS

QUESTION 27

Which statements about OceanStor 100D are true? (Multiple choice)

- * It stores metadata in metadata nodes.
- * It employs a distributed cluster architecture.
- * It provides background data consistency checks.
- * It can be scaled out to a maximum of 4096 nodes.

QUESTION 28

Which of the following are the end-to-end architecture optimization implemented by Dorado? (Multiple choice)

- * ROW-based full-stripe write and snapshot technology
- * Multi-stream technology on SSDs.
- * Global garbage collection
- * RAID-TP

QUESTION 29

Fusion Storage supports the iSCSI protocol only in VMware scenarios.

- * True
- * False

QUESTION 30

How many controllers can be concurrently accessed by a single SSD in OceanStor Dorado V6 high-end storage?

- * 8
- * 2

* 4

* 1

QUESTION 31

Which networking architectures are provided by Huawei geo-redundant 3D DR solution? (Multiple choice)

- * Serial networking
- * Parallel networking
- * Ring networking

QUESTION 32

Which of the following are benefits of front-end interconnect (shared) I/O modules? (Multiple choice)

- * Host path loss prevention in the event of controller failure, controller hard/software upgrades, and even single FC 1 between host and storage.
- * Storage sysadmins are needed to ensure the multipath software in servers runs online before controller upgrades.
- * Fewer front-end modules and host links needed.
- * Direct data dispatch to the distributed controllers through front-end modules in one controller enclosure.

QUESTION 33

Which of the following are application scenarios of disk pre-copy? (Multiple choice)

- * Slow disk
- * Risky disk
- * Failed disk

QUESTION 34

What is the IO model for Vdbench performance testing on the test of "Random Read and Write Performance (With Data Reduction)?"

- * 16KB_70%Read_100% Random
- * 8KB_100%Read_70%Radom
- * 8KB_70%Read_100%Random
