[UPDATED 2023] Sitecore-10-NET-Developer dumps Free Test Engine Verified By Certified Experts
Realistic Sitecore-10-NET-Developer Accurate & Verified Answers As Experienced in the Actual Test!

NO.22 Which three areas of Sitecore allow you to view the available workflow commands of an item you are editing? (Choose three.)

- * Security Editor
- * Workflow Command
- * Experience Editor
- * Content Editor
- * Workbox
- * Path Analyzer

NO.23 You are using Sitecore MVC to develop an area of a company's website that will require the use of Sitecore's Personalization Engine to change the rendering that is displayed to a visitor. What type of component binding will allow the Designer to use personalization to change the component?

- * Static component binding, because you are able to give Authors the ability to change the presentation of the page.
- * Static component binding, because you are able to ensure that content rendered in the placeholder is always the same when the component is selected.
- * Dynamic component binding, because you are able to ensure that the content rendered in the placeholder is always the same.

* Dynamic component binding, because you are providing a placeholder to enable flexibility to change the components that make up the presentation of a page.

NO.24 What is the purpose of item includes within Sitecore Content Serialization module.json files?

- * Includes specify which path or paths of the content tree should be serialized.
- * Includes determine how and when the automatic schedule for module serialization is executed.
- * Includes specify which other modules are dependencies for the given items.
- * Includes specify how items are serialized and committed to source control.

NO.25 Which of the following information is available within Workbox?

- * Number of editable data source items in all of Sitecore
- * Information about an item's originating template
- * Number of active campaigns divided by marketing team
- * Available workflow commands divided by associated workflow

NO.26 For non-SXA websites, why is it recommended to avoid setting presentation details directly on new content items?

- * Defining presentation details on standard values ensures all the fields related to an item's presentation are configured for access by content creators.
- * Sitecore does not allow presentation details to be changed at the content-item level, so they must be set and edited from the standard values of templates.
- * It allows all content items made from the same template to have the same presentation details by default and eliminates additional work during content creation.
- * It forces a prompt to appear when new content items are created so Content Authors can finalize the presentation details for the new content items.

NO.27 How does content serialization with the Sitecore CLI or Sitecore for Visual Studio support the development experience?

- * By acting as a data-storage solution for every item in the content tree
- * By providing a process for building out templates and layouts with a graphical interface walkthrough
- * By providing a feature for testing content synchronization during the development process
- * By allowing Developers to easily move and share Developer-owned items across different environments

NO.28 What is a reason to set the insert options on a specific item under the content node of the content tree?

- * To allow Content Authors to insert items into the content tree for all the templates they have access to
- * To allow Content Authors to insert items under the specific item in addition to what is included with the item's standard values
- * To allow Content Authors to insert new items under any item within the content tree
- * To allow Content Authors to insert items created from any system template into the content tree under the specific item

NO.29 While developing using Sitecore MVC, you modify a file in your Visual Studio project outside of the webroot folder. What can you do to see the changes within the Sitecore installation?

- * Publish the file using the Sitecore Rocks Publish file command.
- * Copy the file to the webroot using Visual Studio's Publish command.
- * Use the Sitecore Global Publish to publish everything.
- * Publish the entire site when you are in the Content Editor.

NO.30 Which four statements are true about developing with the SitecoreASP.NET Core Rendering SDK? (Choose four.)

- * It enables the Content Delivery instance to handle all of the development workload.
- * It allows you to create independent applications that render Sitecore content.
- * It helps you build small, lightweight .NET Core applications for Sitecore.
- * It enables you to remove ASP.NET from your solution.

- * It allows you to extend Sitecore pipelines using .NET Core.
- * It depends on the Sitecore Layout Service.
- * It enables you to preview your code changes without having to restart the Sitecore environment.

NO.31 When you want to refer to a specific placeholder in the presentation details, which identifier do you use?

- * Placeholder ID
- * Key ID
- * Placeholder Key
- * Item Key

NO.32 If the Sitecore Content Management instance can be accessed by multiple host names, what would you do to enable users for each site to be able to log in to the Sitecore shell?

- * Patch the web.config for the Content Management instance with the required permission groups.
- * Update the role for each user group to include the appropriate site permissions.
- * Remove all specific host names from the Identity Server configuration settings file and replace them with wild-card options.
- * Add AllowedCorsOriginsGroup for each site to the Identity Server configuration.

NO.33 When creating your containerized Sitecore environment with Docker, for the ease of launching the containers, which two files are recommended? (Choose two.)

- * clean.ps1
- * docker-compose.yml
- * compose.yml
- * .env
- * docker.exe

NO.34 In a non-SXA website, you have created a layout definition item and want to designate the layout as part of the presentation details. According to Sitecore best practices, where should you set presentation details?

- * Standard values
- * On the individual items
- * Rendering parameters
- * Standard template

NO.35 You want to control the order in which patch files load. Which element could you use in the Layers.config file to accomplish this?

- * <configLayer>
- * <loadOrder>
- * <configLoad>
- * <patchOrder>

NO.36 What is the purpose of a Sitecore Support Package?

- * To help Sitecore replicate an issue without needing to access the environment directly.
- * To let Sitecore Support Services access active logs running directly in the environment.
- * To make it easier for you to download update packages and install them into your environment.
- * To give Sitecore direct access to your environment for support purposes.

NO.37 Which statement characterizes the Sitecore Extranet security domain?

- * It provides default access to the Sitecore identity server for users to log in to the appropriate environment areas.
- * It is an internal security domain for users that can access the Sitecore client tools and editing functionality.
- * It is the domain that contains user accounts as well as customized roles for managing read access to the website content.
- * It provides customized roles for controlling access to third-party environments such as a CRM or payment portal.

NO.38 When using Sitecore MVC, which static class contains information about any current HTTP request?

- * Sitecore.HttpContext. Request
- * Sitecore.Context
- * Sitecore.Request
- * Sitecore.HttpContext

NO.39 A company you develop for wants to temporarily change the design for their main page for a company anniversary celebration. Because this will be a specific version of the main page that is published for a specific period, which Sitecore feature enables you to accomplish this change while easily allowing you to revert to the original design?

- * Final layouts
- * Shared layouts
- * Restricted layouts
- * Versioned layouts

NO.40 If you want to limit the serialization of items under the Navigation item to the item itself and those one step below, what property should you add to the includes to indicate this limitation?

- * Item path
- * Scope
- * Nothing, this is the default
- * Name

NO.41 You are designing a component that will allow users to select a content item from a specific place within the content tree as the data source. How will you ensure the component is flexible and the user can select a content item upon use?

- * Ensure the insert options for the component are enabled so the Author can change the content item for the component.
- * Ensure the users can create a new component from Experience Editor and configure the Datasource Template field.
- * Ensure the component supports a change to the data source and configure the Datasource Location field.
- * Ensure you add a placeholder within the component so the Experience Editor prompts the user for a content item.

NO.42 With Sitecore MVC, how do you ensure a field cannot be edited when you use the field helper to render content?

- * Use the non-editable equivalent field type.
- * Use the DisableWebEdit option.
- * Set the editable parameter to `“false”`.
- * Mark the field as non-editable in the field definition item.
