[Oct 13, 2023] Valid C-TS411-2021 Test Answers & SAP C-TS411-2021 Exam PDF
Realistic C-TS411-2021 Exam Dumps with Accurate & Updated Questions

Candidates who pass the SAP C_TS411_2021 certification exam will receive the SAP Certified Application Associate - SAP S/4HANA R&D Engineering certification. Certified Application Associate - SAP S/4HANA R&D Engineering certification is widely recognized by employers and can help professionals advance their careers in SAP S/4HANA R&D engineering. In addition, SAP Certified professionals are often eligible for higher salaries and better job opportunities.

SAP C_TS411_2021 certification exam is designed for individuals who wish to validate their skills and knowledge in SAP S/4HANA R&D Engineering. Certified Application Associate - SAP S/4HANA R&D Engineering certification exam tests the candidate's abilities to work with SAP S/4HANA R&D Engineering, including understanding the architecture, configuration, and implementation of the system. Passing C-TS411-2021 exam is an excellent way to demonstrate proficiency in this area and increase career opportunities.

NEW QUESTION 24

You connected characteristics inside one class to organizational areas. What are the benefits?Note: There are 2 correct Answers to this question.
* A check for the same classification is only possible inside one organizational area.
* A check for the same classification is possible for all organizational areas.
* Users can only work with characteristics depending on the authorization for a particular organizational area.
* Users can always see all characteristics for all areas.

NEW QUESTION 25

Working with the document status, what should you keep in mind?Note: There are 2 correct Answers to this question.
* It can be set at object link level.
* It can only be defined plant specific.
* It can be defined as a status network.
* It can be defined depending on document type.

NEW QUESTION 26

You can use the syntax element $set_pricing_factor for pricing in object dependencies.What do you need to consider?Note: There are 2 correct Answers to this question.
* Negative factors must not be used in $set_pricing_factor.
* $set_pricing_factor sets the variant condition and adds a factor to it. The variant condition must not already be assigned.
* You cannot use zero as a factor in $set_pricing_factor.
* $set_pricing_factor adds only one factor. The variant condition must already be assigned.

NEW QUESTION 27

You assigned a released characteristic to a class. What happens when you change the characteristic status to locked?Note: There are 2 correct Answers to this question.
* This has no effect on the assigned classes or objects.
* You can no longer assign this characteristic to other classes.
* The characteristic is invisible in classes and objects.
* You cannot change the status as the characteristic is assigned.

NEW QUESTION 28

For which applications can you define formulas inside a Work Center?Note: There are 3 correct Answers to this question.
* Capacities
* HR assignment
* Scheduling
* Hierarchy
* Costing

NEW QUESTION 29

You can assign object dependencies to different master data.Which assignments have no effect in variant configuration and only affect classification?
* Assignment to Classes
* Assignment to Characteristic Values

* Assignment to Configuration Profiles
* Assignment to Characteristics

NEW QUESTION 30

Where can you create routings?Note: There are 3 correct Answers to this question.
* In the classic transaction or corresponding Fiori app for Variant Configuration Modeling Environment (PMEVC)
* In Product Structure Synchronization
* In the classic transaction or corresponding Fiori app for the creation of routings (CA01)
* In Visual Manufacturing Planner
* In the classic transaction or corresponding Fiori app for the Engineering Workbench (CEWB)

NEW QUESTION 31

Which scenarios are possible when you upload files to a Product Master?Note: There are 2 correct Answers to this question.
* You can easily attach a Document Info Record.
* You cannot attach a Document Info Record.
* You can easily upload a file without selecting a Workstation Application and a Content Server.
* You can easily upload a file, select a Workstation Application and a Content Server.

NEW QUESTION 32

What is a clear indicator of having local object dependencies?
* Name
* Syntax
* Administrative data
* Status

NEW QUESTION 33

Which scenario is possible when you create plant specific data with the Product Master app?
* You can define multiple plant information outside Product Master.
* You can only define one plant information inside Product Master.
* You can only define one plant information outside Product Master.
* You can define multiple plant information inside Product Master.

NEW QUESTION 34

What happens if the characteristic status is not set to Released?
* The characteristic can only be changed.
* The characteristic cannot be assigned to a class.
* A value of this characteristic cannot be assigned in configuration.
* A value of this characteristic cannot be assigned in classification of a configurable material.

NEW QUESTION 35

How can you set up a class hierarchy?Note: There are 2 correct Answers to this question.
* Assigning a class to a superior class.
* Using a class BOM.
* Using object links.

* Using class hierarchy maintenance.

NEW QUESTION 36

What happens to the group BOM when you do a plant assignment?
* The internal number and the BOM usage becomes new.
* The internal number stays unchanged and the BOM usage becomes new.
* The internal number becomes new and the BOM usage stays unchanged.
* The internal number and the BOM usage stays unchanged.

NEW QUESTION 37

Which prerequisites must be fulfilled before a configuration profile can be created and released for a configurable material?
* At least one variant class must be assigned to the configurable material. Values must be assigned to the characteristics here.
* At least one variant class must be assigned to the configurable material.
* At least one variant class must be assigned to the configurable material. Values must not be assigned to the characteristics here.
* Exactly one variant class must be assigned to the configurable material.

NEW QUESTION 38

Which of the following objects can you connect with a revision level?Note: There are 2 correct Answers to this question.
* Classes
* Document
* Work Center
* Material Master

NEW QUESTION 39

The value assignment interface for variant configuration can be structured using interface design and characteristic groups.What can be used depending on the processing mode?
* You can use interface design and characteristic groups for both processing modes.
* You can only use Interface Design for Processing Mode Classic and Characteristic Groups only for Processing Mode AVC.
* You can only use Interface Design for Processing Mode AVC and Characteristic Groups for Processing Mode Classic.
* You can use interface design for both processing modes, but characteristic groups only for Processing Mode AVC.

NEW QUESTION 40

Why do you use the Restrictions tab in a characteristic?
* To control the authorization groups for the characteristic
* To control the authorizations for the characteristic
* To restrict the assignment of characteristics to the classes you enter
* To restrict the assignment of characteristics to classes of the class types you enter
