The C\_S4CFI\_2302 exam consists of 80 multiple-choice questions and has a time limit of 180 minutes. C-S4CFI-2302 exam is available in English, Japanese, Korean, and Simplified Chinese. The passing score for C-S4CFI-2302 exam is 65%, and the certification is valid for two years. C-S4CFI-2302 exam fee is \$550 USD, and it can be taken at SAP training centers or online through the SAP Learning Hub.

### NEW QUESTION 61

SAP S/4HANA Cloud Configuration and User Management Which activities does the expert configuration allows? 2 answers

- \* Creation of new process in customer owned area
- \* Adaption of editable fields within SAP Best Practice content
- \* Customization through IMG outside self-service configuration UI tools
- \* Deletion of SAP Best Practices content before Quality system activation

The activities that the expert configuration allows are:

Creation of new process in customer owned area

Customization through IMG outside self-service configuration UI tools You cannot use the expert configuration to adapt editable fields within SAP Best Practice content, delete SAP Best Practices content before Quality system activation, or add new SAP Best Practice business processes. ### NEW QUESTION 62

Which of the following transactions updates values in Profitability Analysis (CO-PA) reporting?

- \* Enter statistical key figure
- \* Run allocations
- \* Maintain activity prices
- \* Post asset acquisition

Posting asset acquisition is one of the transactions that updates values in Profitability Analysis (CO-PA) reporting. This transaction records the acquisition cost of an asset as a primary cost in CO-PA. Other transactions that update CO-PA reporting are sales order, billing document, and production order settlement. Reference:

### NEW QUESTION 63

Real-Time Reporting and Monitoring

How can business users create new analytics content? 3 answers

- \* Create open core data services (CDS) views
- \* Change underlying database tables of standard data sources
- \* Create new data source via joins of standard data sources
- \* Create additional key figures in existing data sources
- \* Change existing data sources by adding filters

### NEW QUESTION 64

Which functionalities are supported by the SAP Fiori Test Your Processes app? (Choose two.)

- \* Remediate failed test scenarios
- \* Import custom test plans
- \* Migrate test plans for execution
- \* Create or change test plans

### NEW QUESTION 65

Which of the following changes would prevent SAP from running automated business process tests on your behalf? Note: There are 2 correct answers to this question.

- \* SAP-made changes to the standard test process

- \* Configuration changes that impact the process flow
- \* Changes to the SAP S/4HANA Cloud release (upgrade)
- \* Changes to the data input requirements (custom data fields)

The changes that would prevent SAP from running automated business process tests on your behalf are:

Configuration changes that impact the process flow

Changes to the data input requirements (custom data fields) These changes would require manual adjustments to the test scripts or data sets to ensure that they match your customized solution. SAP-made changes to the standard test process or changes to the SAP S/4HANA Cloud release (upgrade) do not prevent SAP from running automated business process tests on your behalf, as they would be reflected in the predefined test content. ### NEW QUESTION 66

What are the prerequisites for using the SAP Fiori app Test your process? 2 correct answers

- \* The test scripts are uploaded to SAP S/4HANA Cloud
- \* The development system is connected to the implementation landscape.
- \* SAP Best Practices are activated in the system and connected to Test Engine on SAP cloud platform
- \* Test user has all the necessary roles to run the process.

The prerequisites for using the SAP Fiori app Test your process are:

SAP Best Practices are activated in the system and connected to Test Engine on SAP cloud platform Test user has all the necessary roles to run the process You do not need to upload test scripts to SAP S/4HANA Cloud or connect the development system to the implementation landscape for using this app. Reference:

### NEW QUESTION 67

Which activities does the consultant do before the first Fit-to-Standard workshop? Note: There are 2 correct answers to this question.

- \* Evaluate the Business-Driven Configuration Questionnaire responses.
- \* Review the integration requirements collected from the Digital Discovery Assessment
- \* Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment.
- \* Upload customer master data in the Starter system using migration templates.

### NEW QUESTION 68

What is a service order in the Service Line of Business?

- \* A confirmation of an agreement between a service provider and service recipient.
- \* Outline agreement with a business partner that defines services offered for a particular period..
- \* Long-term agreement with a customer that defines the content and scope of services guaranteed within specific tolerance limits for certain parameters (e.g. predefined time frames).
- \* Short-term agreement between a service provider and a service recipient with information relevant to the specific service process.

A service order is a short-term agreement between a service provider and a service recipient with information relevant to the specific service process, such as the service date, location, duration, and price. A service order is not a confirmation, an outline agreement, or a long-term agreement. Reference:

### NEW QUESTION 69

For which of the following activities is the starter system used?

- \* Transport the solution configuration to the quality system.
- \* Set up the Test Automation Tool.
- \* Run integration testing.
- \* Document delta requirements in the backlog.

One of the activities that you use the starter system for is to document delta requirements in the backlog. The starter system is a temporary system that is used for scoping and configuration activities during the Explore phase. You can use the starter system to document any delta requirements that are identified during Fit-to-Standard workshops in a backlog using an app such as Manage Backlog Items. Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

### NEW QUESTION 70

For which activity do you use SAP S/4HANA Cloud for Credit Integration? Note: There are 2 correct answers to this question.

- \* Supplement internal customer data to better monitor a customer's credit risk
- \* Calculate a customer's real-time credit limit based on a manual credit rating
- \* Notify an external credit agency about outstanding customer payments
- \* Import customer credit ratings from external credit rating agencies

You can use SAP S/4HANA Cloud for Credit Integration for the following activities:

Supplement internal customer data to better monitor a customer's credit risk Import customer credit ratings from external credit rating agencies You cannot use SAP S/4HANA Cloud for Credit Integration to calculate a customer's real-time credit limit based on a manual credit rating, notify an external credit agency about outstanding customer payments, or export customer credit ratings to external credit rating agencies.
