

(2023) 1z0-931-23 Dumps and Practice Test (175 Questions) [Q72-Q88]

(2023) 1z0-931-23 Dumps and Practice Test (175 Questions)
Guide (New 2023) Actual Oracle 1z0-931-23 Exam Questions

NO.72 Which workload type does the Autonomous Database on dedicated infrastructure service currently support?

- * Autonomous Transaction Processing only
- * ATP and ADW
- * Autonomous Data Warehouse only
- * Hybrid Columnar compression

NO.73 Which two optimizations are different between Autonomous Data Warehouse and Autonomous Transaction Processing?

- * Undo Management
- * Index Storage
- * Memory Usage
- * Data Organization
- * Backup Retention

NO.74 Which statement is FALSE about Oracle Text?

- * It provides indexing, word and theme searches
- * It is suited to search document collections
- * It requires an Oracle Text license for Autonomous Database
- * It uses standard SQL queries

NO.75 As a database architect, you are tasked with configuring a high concurrency, production OLTP (online transaction processing) application to connect to an Autonomous Transaction Processing database with a requirement to have some reporting queries run in parallel mode.

Which connection service is appropriate for such a workload?

- * MEDIUM
- * HIGH
- * TP
- * TPURGENT

NO.76 Which data file format is NOT supported when using the package DBMS_CLOUD on Shared Exadata Infrastructure?

- * Data Pump Export File
- * Avro
- * Parquet
- * Text
- * JSON
- * Microsoft SQL Server (.mdf)

<https://docs.oracle.com/en/cloud/paas/autonomous-database/adbsa/format-options.html#GUID-08C44CDA-7C81-481A-BA0A-F7346473B703>

.mdf format is for MS SQL server database file

NO.77 You have a requirement to create an Autonomous Transaction Processing database that can support at least 200 concurrent statements per OCPU as well as parallelism.

Which service will you need to connect to?

- * TPURGENT
- * TP
- * MEDIUM
- * LOW

tpurgent: The highest priority application connection service for time critical transaction processing operations. This connection service supports manual parallelism.

<https://docs.oracle.com/en/cloud/paas/atp-cloud/atpug/connect-predefined.html#GUID-9747539B-FD46-44F1-8FF8-F5AC650F15BE>

NO.78 Which two methods can you use to create users and grant roles in Autonomous Database services? (Choose two.)

- * through the Oracle Cloud Infrastructure service console
- * through SQL/Developer s
- * using DBMS_CLOUD_ADMIN package
- * through SQLPlus

<https://oracle-base.com/articles/vm/oracle-cloud-autonomous-data-warehouse-adw-create-service>

<https://docs.oracle.com/en/cloud/paas/autonomous-data-warehouse-cloud/user/connect-sqlplus.html#GUID-A3005A6E-9ECF-40CB-8EFC-D1CFF664EC5A>

<https://docs.oracle.com/en/cloud/paas/autonomous-data-warehouse-cloud/user/connect-sql-dev.html#GUID-FB611317-2999-4C8C-8A3B-B3B3D3C5B417>

<https://docs.oracle.com/en/cloud/paas/autonomous-data-warehouse-cloud/user/dbms-cloud-admin.html#GUID-D76B229E-781E-45C0-9F14-CAF30F9E6E3B>

“To create users in your database, connect to the database as the ADMIN user using any SQL client tool.”

<https://docs.oracle.com/en/cloud/paas/autonomous-data-warehouse-cloud/user/manage-users-create.html#GUID-54CA837B-CD6A-4ED2-A960-5874535818CB>

NO.79 What command should you issue to enable application continuity on Autonomous Database Shared Infrastructure?

- * alter database set application_continuity=true
- * alter session set application_continuity=true
- * exec dbms_cloacl_admin.enable_app_cont (‘ <service_name> ‘);
- * alter system set application_continuity=true

<https://docs.oracle.com/en/cloud/paas/autonomous-database/adbsa/dbms-cloud-admin.html#GUID-42B9DDB0-12A7-4EE3-9860-30EFA41061E9> If it was asking for Autonomous Database Dedicated Infrastructure, then answer would be execute DBMS_APP_CONT_ADMIN.ENABLE_AC(‘databaseid_tpurgent.adb.oraclecloud.com’, ‘LEVEL1’, 600);

NO.80 Which three Oracle Cloud Infrastructure (OCI) resources do you need to configure before provisioning your Autonomous Database with Private Endpoint?

- * Network Security Group
- * Security List
- * VCN
- * Route Table
- * Subnet

To provision an Autonomous Database with a private endpoint, you must have the following resources already created:

A VCN within the region that will contain your Autonomous Database with shared Exadata infrastructure. Cannot be changed after provisioning.

A private subnet within your VCN configured with default DHCP options. Cannot be changed after provisioning.

At least 1 network security group (NSG) within your VCN for the Autonomous Database. Can be changed or edited after provisioning.

<https://docs.oracle.com/en-us/iaas/Content/Database/Concepts/adbsprivateaccess.htm>

NO.81 Which two protection modes are supported by Data Guard on Autonomous Database on Dedicated Infrastructure?

- * Maximum Continuity
- * Maximum Availability
- * Maximum Performance
- * Maximum Protection

NO.82 In which four ways can Oracle Database optimally access data in Object Storage?

- * optimized data archive using partitioned external tables

- * optimized data archive using hybrid partitioned tables
- * scan avoidance using block skipping when reading parquet and orc files
- * scan avoidance using columnar pruning for columnar stores like parquet and orc
- * scan avoidance using partitioned external tables
- * scan avoidance using columnar pruning for .csv files

NO.83 Which Autonomous Database Cloud service ignores hints in SQL Statements by default?

- * Autonomous Transaction Processing
- * Autonomous Data Warehouse
- * Neither service ignores hints by default
- * Both services ignore hints by default

Managing Optimizer Hints with Data Warehouse Workloads

Autonomous Database with Data Warehouse ignores optimizer hints and disables hints in SQL statements by default. If your application relies on hints you can enable optimizer hints by setting the parameter `OPTIMIZER_IGNORE_HINTS` to `FALSE` at the session or system level using `ALTER SESSION` or `ALTER SYSTEM`. For example, the following command enables hints in your session:

```
ALTER SESSION
SET OPTIMIZER_IGNORE_HINTS=FALSE;
```

Copy

NO.84 You are requested to analyze a year's stock purchase data which is stored in Autonomous Data Warehouse instance.

Which tool would you use to automate data exploration and create pivot tables?

- * Business Models
- * Data Load
- * SQL Developer Web
- * APEX

NO.85 Which two methods can you use to define Oracle Machine Learning users?

- * SQL Developer
- * the `DBMS_CLOUD_ADMIN` package
- * Oracle Cloud Infrastructure Console
- * Service Console

NO.86 Which two actions are available to perform when an Autonomous Database is stopped?

- * Start
- * Update Network Access
- * Change administrator password
- * Update License Type

NO.87 Which statement is NOT correct when setting up compartment quotas?

- * There are three types of quota policy statements which are set, unset and zero.
- * Compartment quotas use policies that allow allocation of resources with a high level of flexibility.
- * Along with compartment budgets, compartment quotas create a powerful toolset to manage your spending.
- * Compartment quotas are set by Oracle.

<https://docs.oracle.com/en-us/iaas/Content/General/Concepts/resourcequotas.htm>

NO.88 Which statement is true when the Autonomous Database has auto scaling enabled?

- * Database concurrency is scaled up when needed by the workload.
- * Increases the number of sessions available to the database.
- * Scales the PGA and SGA size when needed for the workload.
- * Enables the database to use up to 3x CPU/IO resources immediately when needed by the workload.
