C-SEN-2205 Free Study Guide! with New Update 82 Exam Questions
Get up-to-date Real Exam Questions for C-SEN-2205 UPDATED [2023]

SAP C-SEN-2205 exam is intended for professionals who have experience working with SAP Enable Now and want to prove their expertise in the field. C-SEN-2205 exam is designed to test the candidate's knowledge and understanding of the different features, functionalities, and capabilities of the software. It includes questions on topics such as recording and editing, simulation, and documentation creation, among others.

SAP Enable Now platform is a comprehensive tool that enables companies to create and deliver training and documentation materials to their employees. By obtaining the C-SEN-2205 certification, professionals can showcase their ability to create and deliver effective training materials using SAP Enable Now, as well as their knowledge of best practices for documentation and training.

NO.26 What are the characteristics of playback settings? Note: There are 2 correct answers to this question.

* They can be modified by end users.

- * They are saved in the trainer resource.
- * They can be set on project level by using the Project Override settings.
- * When they are appended to the URL, they override default settings.

NO.27 Which of the following parameters build a complete and valid Web Assistant context? Note: There are 3 correct answers to this question.

- * Product version
- * Protocol
- * System
- * Framework ID
- * Product name

NO.28 You want to restore an object to a previous version. What must you consider?

- * All versions lower than the reverted version are deleted.
- * Restoring a version is only possible in Instant Producer.
- * A copy of the to be restored object becomes a new version.

NO.29 A customer wants to use Desktop Assistant for a non-SAP target application that is not listed in the Product Availability Matrix (PAM) and asks you whether this is possible. What do you reply?

- * Desktop Assistant can be rolled out for an application, but will support the application context only.
- * Because the application is not listed in the PAM, Desktop Assistant cannot be rolled out for this application.
- * The PAM shows the limitations for SAP applications. Non-SAP applications are supported out-of-the-box.
- * Because the application is not listed in the PAM, it is not officially supported. You must evaluate whether the application will work.

NO.30 In the case of a manual login to Manager, what should you consider regarding the user names and passwords?

- * User names and passwords are always manually created.
- * User names and passwords must have special characters.
- * User names and passwords can come from external identity providers.
- * User names and passwords must be imported via Excel before use.

NO.31 Your customer uses SAP Enable Now, cloud edition and the Desktop Assistant. They want to use an on-premise web server to deliver the content. What must they consider?

- * MIME type .inav must be supported by the web server.
- * A specific .xdnt file pointing to the web server must be created and uploaded to the Manager.
- * Desktop Assistant on-premise must be installed on each end-user machine.
- * The web server must be Microsoft IIS.

NO.32 What is the purpose of recognition and re-recognition validation? Note: There are 3 correct answers to this question.

- * To find out what content types to produce for which target application
- * To sell additional SAP Enable Now components
- * To find out if custom profiles need to be created
- * To set the customer expectations to a realistic level regarding recognition and re-recognition
- * To provide a training plan for authors to avoid authoring limitations

NO.33 Your customer's IT department does not want to roll out Desktop Assistant. Their concern is that Desktop Assistant is not secure because it collects sensitive user data from the target application. How do you address this concern? Note: There are 2 correct answers to this question.

- * Desktop Assistant reads interface information only from the target application.
- * Information that is read by Desktop Assistant is only handled locally.

- * The collected sensitive user data is only accessible in a permission-based report.
- * The collected data will be anonymized before the data is sent back to the server.

NO.34 You implement SAP Enable Now and want to use the customer's existing data and applications. What does SAP recommend you do? Note: There are 2 correct answers to this question.

- * Import existing customer content via SCORM into SAP Enable Now Manager.
- * Use the customer's Learning Management System (LMS) for courseware delivery and tracking.
- * Connect SAP Enable Now with the customer's incident management system.
- * Use the customer's Business Process Model data as a starting point for the Library design.

NO.35 You are planning an SAP Enable Now on-premise implementation. What must you do to ensure network security compliance? Note: There are 2 correct answers to this question.

- * Add the Upload Active Content permission to all users.
- * Contact network administrators to confirm that the network security restrictions allow the required MIME types.
- * Use standard ports only.
- * Adapt the password policy of the Manager to the password policy of the customer.

NO.36 What must you do before you update SAP Enable Now on-premise? Note: There are 2 correct answers to this question.

- * Download the SAP Enable Now installers from SAP Service Marketplace.
- * Edit the workarea resources entity.xml files manually.
- * Preview the new version of SAP Enable Now and test the content.
- * Back up the file repository and database.

NO.37 A customer wants to implement SAP Enable Now, cloud edition. What technical prerequisites do you have to consider? Note: There are 2 correct answers to this question.

- * The Adobe Flash plug-in has to be installed on every end user computer.
- * All customer users need to be synchronized to the Identity Authentication service tenant before the implementation.
- * The customer's firewall must allow access to SAP Cloud Platform from any end user computer.
- * For authoring or consuming electronic performance support content using Desktop Assistant, either the SAP Enable Now App Launcher or a suitable Java runtime need to be installed on every end user computer.

NO.38 A customer asks you to validate the recognition and re-recognition for all applications involved in a project. What must the customer provide to you? Note: There are 2 correct answers to this question.

- * The SAP Enable Now recording profile for the applications
- * All specific application requirements (Terminal Server, Citrix, local only, etc.)
- * Access to the applications
- * Administrator credentials

NO.39 Where can you find the instructions to configure Web Assistant for SAP S/4HANA?

- * In the Web Assistant Authoring Guide on SAP Help Portal
- * In the SAP S/4HANA Configuration Guide on SAP Help Portal
- * In the Troubleshooting Guide in the SAP Enable Now Info Center
- * In the Web Assistant Integration Guide on SAP Help Portal

NO.40 What is the purpose of the compound document generation function? Note: There are 3 correct answers to this question.

- * Merge different contents from a project into one document.
- * Merge different contents from a group into one document.
- * Merge different contents from a workarea into one document.
- * Merge SAP Enable Now contents and external contents into one document.
- * Merge different contents from a book into one document.

NO.41 Your customer wants to run an SAP Enable Now Manager-based scenario and asks for hardware and network performance requirements. How do you advise this customer? Note: There are 2 correct answers to this question.

- * Use the server sizing guide to calculate the hardware and network requirements best matching the scenario specifications of the customer.
- * Ask the customer to develop scenario specifications on content access, client usage, and user distribution.
- * Use an existing demo recording, check the corresponding network load and multiply this by the number of licensed end users.
- * Ask the customer for the fastest hardware that can be provided and recommend using this.

NO.42 What are SAP best practices when creating book page content? Note: There are 2 correct answers to this question.

- * Create book pages based on templates.
- * Always insert images directly into the book page.
- * Use shapes to create buttons with links.
- * Use descriptive, individual names for objects.

NO.43 Web Assistant and Desktop Assistant are used as in-app help, but there are differences to consider. Which properties apply only to the Web Assistant? Note: There are 3 correct answers to this question.

- * It requires client installation.
- * It works for all applications.
- * It provides default SAP content for SAP S/4 HANA and SAP SuccessFactors.
- * It offers a dedicated What's New mode.
- * It works on Apple computers and tablets.

NO.44 You open an outdated workarea without Manager connection in Producer of your on-premise edition of SAP Enable Now. How do you migrate the workarea to the current version?

- * You can use the Migrate function in the Tools menu.
- * You can use the Migrate function in the context menu of the Resource object.
- * You will be automatically prompted by a dialog to migrate.
- * You can use the Migrate function in the Workarea menu.

NO.45 What are the best practices to create a recording? Note: There are 2 correct answers to this question.

- * Use the Quick Recording option for the best possible recording results.
- * Set up the application in the same way that the end user would use it.
- * Activate the roll-over effects in the settings for a realistic recording.
- * Create a short storyboard with the steps to be recorded and the data to be used.
