DEA-2TT4 Dumps and Exam Test Engine

**Q70.** Which cloud service model is represented in the exhibit?

- \* Software as a Service
- \* Infrastructure as a Service
- \* Platform as a Service
- \* Database as a Service

**Q71.** Which concept ensures accountability for security breaches or misuse of resources?

- \* Compliance
- \* Governance
- \* Risk management

**Q72.** What capability is provided by the 'Open and extensible' attribute of software-defined infrastructure (SDI)?

- \* Uses APIs to integrate multivendor resources into the SDI environment
- \* Optimizes resource usage and generates value reports about the SDI environment
- \* Provides a control point for the entire SDI environment
- \* Provides multitenancy that enables consumers to share resources in the SDI environment

**Q73.** What is a key element of a cloud portal?

- \* Unified manager
- \* Element manager
- \* Orchestrator
- \* Management interface

**Q74.** What term refers step or a series of steps necessary to complete an attack.

- \* Attack Surface
- \* Work factor
- \* Velocity of attacker
- \* Attack Vector

**Q75.** What is an organizational benefit of adopting modern applications?

- \* Enhances competitiveness
- \* Removes dependency on IT completely
- \* Eliminates CAPEX
- \* Removes dependency on service provider

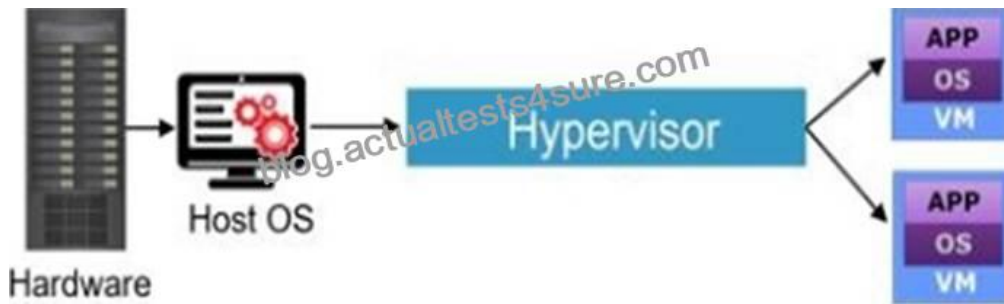

**Q76.** What is a responsibility of DevOps engineer?

- \* Development, testing, and operation of an application or service as part of continuous delivery.
- \* Creating detailed designs for the cloud infrastructure.
- \* Understand what consumers' needs and industry trends to drive an effective product strategy
- \* Streamline service delivery and execution.

**Q77.** What is a benefit of data archiving?

- \* Increases deduplication ratio and reduces storage costs
- \* Avoids performing data backups frequently
- \* Preserves data for future reference and adherence to regulatory compliance
- \* Moves frequently accessed data to lower-cost archive storage

**Q78.** Refer to the exhibit.

Which type of hypervisor is installed in this environment?

- \* Hosted Hypervisor-Type 1
- \* Bare Metal Hypervisor-Type 1
- \* Hosted Hypervisor-Type 2
- \* Bare Metal Hypervisor-Type 2

**Q79.** Which management process ensures business continuity by eliminating single points of failure in a data center?

- \* Availability management
- \* Security management
- \* Capacity management
- \* Performance management

**Q80.** Which activity is conducted during the service termination phase of the cloud service lifecycle?

- \* De-provisioning the service instance
- \* Asking for the service contract
- \* Establishing the billing policy
- \* Providing the final service assessment report

**Q81.** What is a responsibility of Service manager

- \* Understand what consumers' needs and industry trends to drive an effective product strategy
- \* Creating detailed designs for the cloud infrastructure.
- \* Streamline service delivery and execution.
- \* Design and implementation of cloud provisioning processes for delivering cloud services.

**Q82.** What is a key responsibility of a security governance board?

- \* Defining the cloud service catalog
- \* Assessing assets with realistic valuations
- \* Assessing the cloud provider's capability to provide logs
- \* Defining access rights for users

**Q83.** What is the purpose of a bitmap in snapshot creation?

- \* Keeps track of blocks that have changed in the filesystem
- \* Indicates the exact address from which data has to be read
- \* Indicates the exact address to where data has to be written
- \* Keeps track of the number of blocks that are highly utilized

**Q84.** An administrator must design a fault-tolerant IT environment for applications.

Which techniques meet this requirement?

\* Active/Passive for Compute &#8211;

NIC Teaming for Network &#8211;

Dual disks for storage

\* Active/Active for Compute &#8211;

Link Aggregation for Network &#8211;

Erasure Coding for storage

\* Active/Passive for Compute &#8211;

Spanning for Network &#8211;

Dynamic Disk Sparing for storage

\* Active/Standby for Compute &#8211;

Multipathing for Network &#8211;

RAID for storage

**Q85.** What is a responsibility of Cloud engineer?

- \* Design, planning, managing, maintaining, and supporting the cloud infrastructure.
- \* Creating detailed designs for the cloud infrastructure.
- \* Understand what consumers&#8217;needs and industry trends to drive an effective product strategy
- \* Streamline service delivery and execution.

**Q86.** What are the key approaches to application transformation?

- \* Restore, Reuse, Retain, Retire
- \* Refactor, Revise, Retain, Retire
- \* Retain, Refactor, Reuse, Revise
- \* Revise, Restore, Retain, Re-iterate

**Q87.** What is the objective of Confidentiality in information security?

- \* Prevents an unauthorized user from changing data
- \* Non-repudiation and authenticity of information
- \* Ensures that identify credentials are used to verify cloud assets
- \* Restricts user access to data held within the cloud

**Q88.** What term refers to businesses that cautiously and gradually embrace digital transformation?

- \* Digital Evaluators
- \* Digital Laggards
- \* Digital Leaders
- \* Digital Adopters

**Q89.** Which data storage type uses a non-hierarchical address space to store data?

- \* Block
- \* Object
- \* File
