ATlassian ACP-120 (Jira Cloud Administrator) Exam is a valuable certification for individuals who are looking to demonstrate their expertise in managing and administering Jira. It is a challenging exam that covers a wide range of topics related to Jira, and individuals who possess the certification are highly valued in the IT industry. Jira Cloud Administrator certification is recognized by employers worldwide, and individuals who possess the certification can advance their careers and increase their earning potential.

NO.14 The Legal team has the following requirements

- * Notify a list of individuals when issues are set to Pending status
- * Allow project administrators to manage that list on an ongoing basis

Which combination of two configuration elements will meet these requirements (Choose two)

- * Group
- * Workflow validator
- * Custom Event
- * Project Role
- * Workflow condition

NO.15 Your Jira cloud instance has hundreds of projects which are used only by the development team at your organization.

All projects share a single permission scheme New business requirements state:

- * Customer support staff at your organization need to view all issues in all projects
- * They also need to share filters with other users
- * They should not be granted too much access

Identify the appropriate way to configure customer support staff in Jira (Choose one)

- * As a security level
- * As a new project role
- * As a new group
- * With the Trusted role
- * With an approved domain

NO.16 Which configurations do Not have any impact on email notifications sent to users

- * Workflow post functions
- * Version Configurations
- * Custom Events
- * Permission Schemes

NO.17 Users have been adding sensitive information into the Description field of issues in a particular project. You must secure the project by any means necessary so that only members of the Managers group can view the contents of the Description field.

Which approach will definitively satisfy this requirement? (Choose one)

- * Remove everyone from the browse projects permission
- * Remove the description field from the screen used by the view operation
- * Remove everyone except the managers group from every project permission
- * Hide the description field in the field configuration
- * Remove everyone except the managers group from every project role

NO.18 Currently, several groups and project roles are listed in every system event of the DEV Notification Scheme and should remain that way. A new requirement states that when DEV issues move from the status Open to status Assigned, only Project Role (Managers) should be notified. DEV project does not share any of its schemes.

Identify the event that needs to be configured.

- * Custom event
- * Issue Moved
- * Issue Assigned
- * Work Started On Issue

NO.19 Henry was recently assigned multiple issues in a classic software project. He has not received any email notifications about

the assignment of these issues but he received notifications about other changes to issues from this and other projects.

Identify two possible reasons (Choose two)

- * The Issue Updated event does not list the current assignee as a recipient in the project's notification scheme
- * The Issue Assigned event does not list the current assignee as a recipient in the project's notification scheme
- * Henry is missing the Browse Projects project permission in the Jira project
- * Henry adjusted his personal email notification preference to not notify him when he is the assignee of an issue
- * Henry is missing the Assignable User project permission in the Jira project

NO.20 You are a site administrator.

You have created an account for Ashley

You need to log in as Ashley to ensure his permissions are set correctly. Identify why you are unable to log in as Ashley (Choose one)

- * You are not an organization admin
- * Ashley has not accessed your site yet
- * Ashley does not have a managed account
- * Ashley has the role of site admin

NO.21 You created a new project and need to configure notifications.

Managers should be notified when

- * Someone mentions them while adding or editing a comment
- * The issue assignee or reporter is changed
- * Issue links are added or deleted

You assume that users have not turned off any notifications through their Personal settings. Identify the two notification events to which managers should definitely be added (Choose two)

- * Issue Updated
- * Issue Deleted
- * Generic Event
- * Issue Assigned
- * Issue Commented

NO.22 Which three statements are correct about deleting a user account (Choose three)

- * Access to all products and administration functions will be lost
- * Issues that were created by a deleted account will be deleted
- * Individual users can delete their unmanaged accounts
- * Accounts can only be deleted if they have no issues assigned
- * Organization admins can delete managed accounts

NO.23 In his personal settings, Bob has the setting "Email notifications for issue activity" set to "Don't send me email notifications".

Identify two reasons why Bob continues to receive some email notifications from Jira (Choose two)

- * Bob has the "Watch your issues" setting enabled

- * Bob has been subscribed to several filters
- * Bob was added as a watcher of an issue
- * Bob is mentioned directly in a comment
- * Bob was sent an email via the Send email feature in Jira

NO.24 You are setting up Jira Software Cloud for an organization of 250 employees. Product access is already configured to grant new users access to Jira Software by default You now need to configure site access so that it meets these 3 conditions

1. Minimum administration overhead is required
2. Access is granted to the entire organization at the same time
3. Access is restricted only to your organization

Which solution meets these requirements? (Choose one)

- * Set the global mode to public and enable CAPTCHA on sign up
- * Create an invite link and share it with all current and future employees
- * Enable existing users to send invitations to all current and future employees
- * Add all your company's domains as approved domains
- * Approve any domain in the site access settings
