Huawei H12-311 (Huawei Certified ICT Associate-Wireless Local Area Network) Certification Exam is a globally recognized certification exam that focuses on testing the candidate's knowledge and skills in wireless local area network technologies. H12-311 exam is designed for individuals who want to pursue a career in the wireless networking field and want to enhance their skills and knowledge to work efficiently in this area.

NEW QUESTION 39

According to the different parameters of the control signal, what can be divided into by modulation mode? (Multiple Choice)

- * AM
- * FM
- * PM
- * SM

NEW QUESTION 40

There are three types of Huawei load balancing judgment: traffic mode, session mode, and virtual switch mode.

- * True
- * False

NEW QUESTION 41

About the AP access control mode, which of the following statements is wrong? (Multiple choice)

- * By default AP under the control of the access method is not AC Certification
- * By configuring the AP offline also need certification before they can automatically access
- * the white list based on MAC authentication, the authentication can be based on the SN
- * If the AP uses the MAC access control authentication, MAC authentication list outside the AP can also let the on-line manual confirmation

NEW QUESTION 42

The modulation methods adopted by DSSS are BPSK and QPSK respectively.

- * True
- * False

NEW QUESTION 43

Which of the following options are EDCA parameters (Select 2 Answers)?

- * AIFSN
- * SIFS
- * DIFS
- * TXOPLimit

NEW QUESTION 44

Which of the following ports can only belong to one VLAN.

- * access
- * hybrid
- * trunk
- * eth-trunk

NEW QUESTION 45

Which is the longest interval between 802.11 frames?

- * SIFS
- * IFS
- * DIFS
- * PIFS

NEW QUESTION 46

The choice of WLAN coverage antenna, for narrow and long areas, it is recommended to select (), open a short distance area, it is recommended to select ().

- * omnidirectional antenna; omnidirectional antenna

- * omnidirectional antenna; directional antenna
- * directional antenna; omnidirectional antenna
- * directional antenna; directional antenna

NEW QUESTION 47

Among the following obstacles, has the greatest loss of wireless signals.

- * Gypsum ceiling
- * Glass
- * 120mm Brick wall
- * 200mm Concrete wall

NEW QUESTION 48

Engineer A purchased a batch of Huawei APs that support WDS. When the WDS network was formed, the bridge could not be established successfully. Which of the following is the possible reason?

- * The SSIDs of the two APs are different.
- * The power of the two APs is different
- * The channels of the two APs are different.
- * The models of the two APs are different.

NEW QUESTION 49

Which of the following commands can view the current AP license resource usage?

- * display license state
- * display license resource usage
- * display ap all
- * display license esn

NEW QUESTION 50

According to the AP naming rules, which of the following statement about AP4030DN is incorrect?

- * 3 in AP4030DN, which means that the AP supports 3*3MIMO.
- * The first 0 in the AP4030DN represents the AP as an internal antenna.
- * D in AP4030DN means that the AP is a dual-band AP and supports the 2.4GHz and 5GHz bands at the same time.
- * N in the AP4030DN means that the AP is an 802.11n AP.

NEW QUESTION 51

How many management nodes can be supported by eSight standard edition?

- * 60
- * 2000
- * 5000
- * 20000

NEW QUESTION 52

In the 802.11 frame, which is responsible for supervision, mainly used to join or exit the wireless network, and which is the transfer of the connection between the base stations?

- * Data frame
- * Control frame
- * Management frame
- * All Data frame, control frame, management frame have this function

NEW QUESTION 53

Capacity planning mainly estimates the number of APs needed to meet the traffic volume in terms of device performance, number of users, bandwidth requirements, and wireless environment.

- * TRUE
- * FALSE

NEW QUESTION 54

How many channels do China support in 2.4 GHz frequency band?

- * 11
- * 13
- * 3
- * 5

NEW QUESTION 55

In the following options, the role of the AP in the Huawei Mesh network is (). (Multiple Choice)

- * MPP
- * MAP
- * MBP
- * MP

NEW QUESTION 56

What is the wireless client's active scanning to get the surrounding wireless network information by sending frames?

- * Beacon frame
- * Probe Request frame
- * Authentication Request frame
- * Association Request frame

NEW QUESTION 57

A company wants to deploy WLAN. The company has purchased a number of wireless AP that support 802.11n. When the WLAN is deployed, only 802.11n-enabled wireless clients can connect to the company's WLAN.

- * TRUE
- * FALSE
