NO.29 A company needs to maintain and verify backups at a secondary site to meet the following requirements: RTO of two hours, RPO of 12 hours, four weeks retention. Which of the following backup copy job configurations meets these requirements?

- * Periodic backup copy job, scheduled for a two-hour interval, with 56 restore points to retain
- * Periodic backup copy job, scheduled for a 12-hour interval, with 56 restore points to retain
- * Periodic backup copy job, scheduled for a two-hour interval, with 112 restore points to retain
- * Periodic backup copy job, scheduled for a 12-hour interval, with 112 restore points to retain

NO.30 Veeam Explorer for Microsoft SQL Server offers which of the following capabilities? Choose Three options.

- * Restore SQL user accounts
- * Export an SQL database to an .sql file
- * Send SQL tables as attachments via email
- * Publish an SQL database without having to restore them
- * Restore an SQL table to the original server or different server
- * Export an SQL database to a local folder or network drive

NO.31 A physical Windows server has failed Windows updates and is now showing an error message. The server has several volumes: C (60GB), D (2TB) and E (600GB). You urgently need this server up and running again. Which of the following would bring the server back up and running the fastest on the same hardware?

- * Insert the Veeam Recovery Media and restore the entire computer.
- * Perform Instant Disk recovery of the C drive.
- * Insert the Veeam Recovery Media and restore using `“System volumes only”`.
- * Use Restore Guest OS files to restore the bootable image of the system drive.

NO.32 On Monday, a backup administrator found out that some backup jobs were missing from a configuration. They want to roll back the configuration database to Friday's state. Which configuration restore mode should be used?

- * Instant SQL Recovery
- * Veeam Explorer for Microsoft SQL
- * Restart
- * Migrate

https://helpcenter.veeam.com/docs/backup/vsphere/vbr_config_restore.html?ver=120

NO.33 Figure A shows the backup files on a Scale-out Backup Repository (SOBR) created by a single Veeam backup job. The SOBR is configured to offload to capacity tier in move mode. If the offload was completed successfully, what will remain on the performance extents for the files uploaded to the capacity tier?

- * VIB files (metadata and data)
- * VBM files (metadata only)
- * VIB and VBK files (metadata only)
- * VBK files (metadata and data)
- * VIB and VBK files (data blocks only)

NO.34 In Veeam Enterprise Manager, what granular restoration permission can be set for the Restore Operator role?

- * Microsoft OneDrive files
- * Microsoft Exchange items

- * Microsoft Teams channels
- * Microsoft SharePoint documents

Restore Operator: – Access objects from the restore scope on the Machines and Files tabs – Perform restore operations as permitted by the delegation settings

NO.35 Which EMC SAN storage systems are compatible with the Backup from SAN Snapshot feature in Veeam Backup & Replication? (Choose two.)

- * EMC VNXe
- * EMC ISILON
- * EMC VNX
- * EMC Data Domain

NO.36 Veeam Explorer for Microsoft Active Directory offers which of the following capabilities? (Choose three.)

- * Export an object/container to a local folder or network drive
- * Search for an object/container
- * Restore an object/container to a location which is different from original
- * Send an object/container as an attachment via email
- * Export an object/container as a Personal Folder File (.pst)

NO.37 At 18:00, after installation of OS update, a VM is stuck in an infinite boot loop. The VM is configured as follows.

Platform	VMware vSphere
Application	MySQL
Disk 1 (OS)	60 GB, CBT enabled
Disk 2 (DATA)	400 GB, CBT enabled
Disk 3 (LOGS)	35 GB, CBT disabled

The last backup was created at 01:00. Choose the recovery approach that provides the lowest RTO with the least amount of data loss.

- * VM disk recovery with quick rollback of Disk 1
- * Instant VM Recovery
- * Instant VM Recovery with quick rollback
- * Virtual disk restore of Disk 1

NO.38 Which of the following editions introduces the Scale-Out Backup Repository feature?

- * Standard
- * VeeamZIP (free)
- * Enterprise
- * Enterprise Plus

<https://www.veeam.com/blog/introducing-scale-out-backup-repository-coming-in-availability-suite- v9.html>

NO.39 A company has been running off replicated, business-critical VMs at their disaster recovery location since an earthquake near the primary data center occurred. Since the threat has passed, they want to stop the replicas and switch to the VMs at the primary data center without losing data. Which of the following actions is the first step they should take?

- * Failover
- * Permanent failover
- * Commit failback
- * Failback to production
- * Planned failover
- * Undo failover

NO.40 Which of the following should be taken into account when estimating the amount of disk space necessary to store backups?
(Choose two.)

- * Type of a disk (thick or thin)
- * Total size of used data for the VMs being backed up
- * Veeam Backup & Replication edition
- * Hypervisor and host version
- * Retention period for backups

https://helpcenter.veeam.com/backup/70/bp_vsphere/estimating_repository_capacity.html

NO.41 Which types of data are included in a Veeam Backup & Replication configuration backup?

(Choose three.)

- * Backup infrastructure configuration data
- * Full backup of Veeam Backup & Replication Oracle database
- * Full backup of Veeam Backup & Replication SQL database
- * Replication job configuration
- * SMTP settings

NO.42 Where is the Veeam CBT filter driver installed?

- * On every managed backup proxy
- * On every managed server
- * On every managed VMware server
- * On every managed Hyper-V or SMB 3.0 server

https://helpcenter.veeam.com/docs/backup/hyperv/changed_block_tracking.html?ver=95

NO.43 Which of the following can help to reduce the amount of traffic that is sent over the network during the second run of the replication job?

- * Replica mapping
- * WAN Acceleration for replicas
- * Re-IP Rules
- * Replica seeding

https://helpcenter.veeam.com/docs/backup/vsphere/wan_hiw.html?ver=110

NO.44 Which of the following conditions require Microsoft VSS rather than VMware quiescence?

(Choose two.)

- * You want to enable point-in-time restore for a Microsoft SQL server
- * The VM in question is a Linux VM
- * You want Veeam to truncate backup logs for your Exchange server
- * You want to use reverse incremental backup mode
- * The backup data is to be encrypted

NO.45 A Scale-out Backup Repository with one local extent has been configured as follows. A daily VMware backup job retention

is 31 days, keeping weekly GFS full backups for 14 weeks. It is Jan. 20. A file from a backup that occurred on Jan. 1 must be recovered. Where is the data?

- * The archive tier
- * The performance tier and the capacity tier
- * The performance tier
- * The capacity tier

To prepare for the VMCE 2021 exam, Veeam offers a 3-day training course that covers all the topics included in the exam. This training course is designed to provide hands-on experience with Veeam software, and it is delivered by certified Veeam instructors. Candidates can also use online resources, such as the Veeam knowledge base and user forum, to supplement their training and preparation.
