

2025 Realistic E_BW4HANA214 Dumps Latest SAP Practice Tests Dumps [Q20-Q43]

2025 Realistic E_BW4HANA214 Dumps Latest SAP Practice Tests Dumps
E_BW4HANA214 Dumps PDF - E_BW4HANA214 Real Exam Questions Answers

SAP E_BW4HANA214 Exam Syllabus Topics:

TopicDetailsTopic 1- Data Provisioning into SAP HANA and SAP BW- 4HANA- Overview of SAP BW- 4HANA additional innovation areasTopic 2- Deep Dive into the modeling artifacts of SAP BW- 4HANA- Overview of Conversion Approaches toward SAP BW- 4HANATopic 3- Introduction to SAP Core Data Services- Innovations for Selected SAP BW- 4HANA Modeling Areas

NO.20 What are valid reasons to generate external SAP HANA Views for SAP BW/4HANA objects? Note: There are 2 correct answers to this question

- * To leverage the SAP BW Analytic Manager to process BW Queries.
- * To access data in the COLD tier of SAP BW/4HANA Data Tiering Optimization (DTO)
- * To consume SAP BW/4HANA data and manage access with native SAP HANA concepts
- * To apply SAP HANA transformational logic instead of SAP BW/4HANA logic.

NO.21 Which features have been removed from SAP BW/4HANA compared to SAP BW powered by SAP HANA?

Note: there are 2 correct answers to this question.

- * Execute Data Archiving Process (DAO)
- * Attribute Change Run
- * Trigger Delta Merge
- * Execute Analysis Process (APD)

NO.22 Which of the following SAP BW/4HANA objects support the automatic generation of external SAP HANA views? Note:

There are 3 correct answers to this question

- * Info Object Characteristic
- * BW Query
- * Open ODS View
- * Composite Provider
- * Open Hub Destination

NO.23 You want to use a referential join for a combination of transactional data (left table) and master data (right table).

How will this referential join be processed? Note: there are 2 correct answers to this question.

- * It is executed only when columns from both tables are requested
- * It shows all master data to assure the referential integrity
- * It is an inner join that assumes that referential integrity is given
- * It shows all transactional data with an existing master data record

NO.24 To create a BAdI Provider, which SAP BW/4HANA object type do you need?

- * Direct Update Data Store object (advanced)
- * Info Object
- * Planning Enabled Data Store object (advanced)
- * Composite Provider

NO.25 You want to load data from an SAP BW/4HANA system into another SAP BW/4HANA system using Operational Data Provisioning (ODP) of type ODP_BW.

Which objects can be used as a source? Note: There are 3 correct answers to this question.

- * InfoObject Characteristic
- * CompositeProvider
- * DataStore object (advanced)
- * Open ODS View
- * ABAP CDS View

NO.26 You use an Open Hub Destination to distribute SAP BW/4HANA data to a table managed by an SAP database.

Which technologies can be used? Note: There are 2 correct answers to this question.

- * Smart Data Access (SDA)
- * Remote Function Call (RFC)
- * Operational Data Provisioning (ODP)
- * Database Connection (DBCON)

NO.27 Which of the following statements describe the benefits of the SAP BW/4HANA Content Add-On? Note: There are 2 correct

answers to this question

- * The content delivers SAP HANA HDI Calculation Views for Mixed Scenarios.
- * The content delivers Transformations that are optimized to enable push-down to SAP HANA
- * The content follows the LSA++ recommendations and delivers an LSA++ aligned structure.
- * The content delivers predefined settings for SAP BW/4HANA Data Tiering Optimization (DTO).

NO.28 You create a Data Store object (advanced) with only the settings **Staging Data Store Object**; and **Reporting-Enabled**; selected. Which table or combination of tables is used when data is extracted from this Data Store object (advanced) in a data flow?

- * Inbound table only
- * Active Data table only
- * The union of the Inbound table and the Active Data table
- * Changelog table only

NO.29 The SAP BW/4HANA StarterAdd-on is installed and set to the Compatibility mode. How is the SAP BW system affected?

Note: There are 2 correct answers o this question.

- * Virtual InfoProviders for Planning are still allowed.
- * New InfoCubes can be created after getting approval by a whitelist.
- * All objects can be changed after getting approval by a whitelist.
- * The SAP BEx Analyzer is decommissioned.

NO.30 What are key results provided by the SAP BW/4HANA Readiness Check? (3 Answers)

- * List of all BW/4HANA incompatible SAP ERP DataSource
- * List of all BW/4HANA incompatible BW objects in the system
- * List of largest database table and additional sizing information
- * List of all missing SAP notes for installing the SAP BW/4HANA Transfer Cockpit
- * List of all BW/4HANA incompatible add-ons in the system

NO.31 Which rule types support SAP HANA Runtime for Transformations in SAP BW/4HANA? Note: There are 3 correct answers to this question

- * ABAP start routine
- * SQL Script field routine
- * Lookup from Data Store object (advanced)
- * ABAP end routine
- * ABAP field routine

NO.32 You want to create an SAP BW Query showing data loading statistics provided by the SAP BW/4HANA statistical analysis. Which object does SAP deliver to provide data for your requirement?

- * Transient Provider
- * Open ODS View
- * BAdi Provider
- * Composite Provider

NO.33 A customer wants to convert from SAP BW powered by SAP HANA to SAP BW/4HANA Which strategy does SAP recommend based on successor object types? Note: There are 3 correct answers to this question

- * Use Write Interface-Enabled Data Store objects (advanced) instead of Virtual Providers.
- * Use Semantic Groups to organize big data volumes in Data Store objects (advanced).
- * Use ODP SAP source system type instead of a DB-connect
- * Use Composite Providers instead of Info Sets.
- * Use Open ODS Views to establish virtual access for master and transactional data.

NO.34 You want to create SAP HANA HDI Calculation View that consumes an External SAP HANA view representing a Data Store object (advanced). What needs to be defined? (2 Answers)

- * Synonym
- * Cross-schema Service
- * Package
- * Delivery Unit

NO.35 Which operations can you perform in the SAP BW/4HANA Cockpit? Note: There are 3 correct answers to this question

- * Manage requests of Data Store objects (advanced)
- * Execute Data Transfer Processes
- * Define partitions for Data Store objects (advanced)
- * Create and maintain Analysis Authorizations
- * Monitor Process Chains

NO.36 What is a valid reason for leveraging SAP HANA Native Storage Extension (NSE) in the SAP BW/4HANA Data Tiering Optimization (DTO) concept?

- * To move historical data that only needs to be read exceptionally to an external storage.
- * To reduce the SAP HANA memory consumption of data that is only used infrequently
- * To improve the reporting performance for current data which is used frequently.
- * To create an external archive for data, to ensure legal requirements are fulfilled.

NO.37 A customer wants to know the difference between LSA and LSA++ when defining a layered scalable architecture. Which layers are only presented in LSA++? Note: There are 2 correct answers to this question

- * Corporate Memory
- * Architected Data Mart Layer
- * Open Operational Data Store Layer
- * BW Workspace Layer

NO.38 Which BW object type do you need to create a BadI Provider?

- * DataStore object (advance) with Direct Update
- * CompositeProvider
- * DataStore object (advance) in Planning Mode
- * InfoObject

NO.39 You enable a DataStore object(advanced) for reporting by switching on the `“”Externa SAP HANA view””` flag in the settings.

Which authorizations are used when you consume the generated SAP HANA view directly?

- * The combination of the generated analytic privileges in SAP HANA and the analysis authorizations in SAP BW/4HANA
- * The analysis authorizations in SAP BW/4HANA
- * The authorizations for the HDI container access in SAP HANA
- * The generated analytic privileges in SAP HANA

NO.40 For which SAP Cloud solution does SAP recommend using the SAP HANA SDI and its OData adapter to load data into SAP BW/4HANA?

- * SAP Ariba
- * SAP S/4HANA Cloud
- * SAP Concur
- * SAP Success Factors

NO.41 What are valid SAP BW Note Analyzer scenarios? Note: There are 3 correct answers to this question.

- * SAP BW/HANA Data Tiering Optimization
- * SAP BW Modeling Tools Query Designer
- * Conversion from SAP BW to SAP BW/4HANA
- * BW transformations with SAP HANA and ABAP execution
- * SAP Readiness Check for SAP BW/4HANA

NO.42 You plan to virtually consume data from an ABAP CDS View in SAP BW/4HANA and decide to use an Open ODS View. Which source type does SAP recommend?

- * Database Table View
- * Transformation
- * Datasource (BW)
- * Virtual table using SAP HANA Smart Data Access)

NO.43 In an SAP BW/4HANA system you plan to leverage Data Tiering Optimization (DTO) for a DataStore object (advanced). Which activities are required to set up the HOT tier as well as the COLD tier for this object? Note: There are 2 correct answers to this question

- * Choose between Temperature Maintenance “On Partition Level” or “On Object Level”.
- * Define the planned temperature for each partition
- * Specify partitions for the Data Store object (advanced)
- * Create a Data Archiving Process (DAP) for the Data Store object (advanced).
